STATISTICS

OF

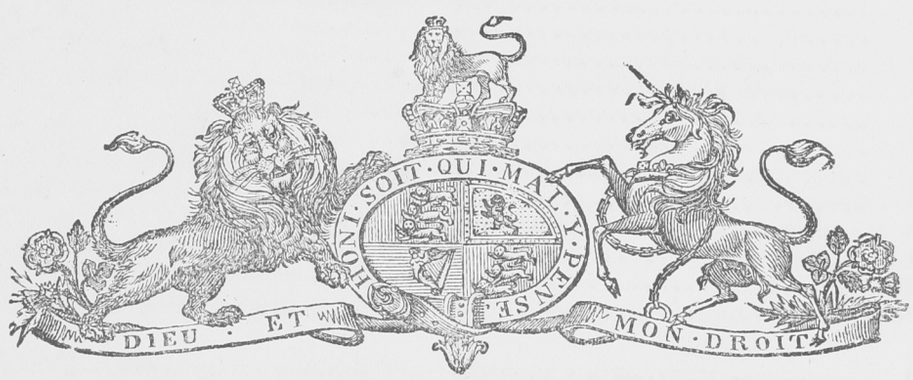
THE COLONY OF TASMANIA

FOR THE YEAR

1868.

COMPILED IN THE OFFICE OF THE STATISTICIAN FROM OFFICIAL RECORDS.

PRESENTED TO BOTH HOUSES OF PARLIAMENT BY HIS EXCELLENCY'S COMMAND.



Tasmania:

JAMES BARNARD, GOVERNMENT PRINTER, HOBART TOWN.

1869.

Extracts from Reports of Collectors of Agricultural Statistics 194

TO THE HONORABLE THE COLONIAL SECRETARY.

Legislative Council Office, July 31, 1869.

SIR,

IN the discharge of my duty as Government Statistician of this Colony, I have the honor to forward to you the Statistics of Tasmania for the year 1868.

I have taken advantage of the experience afforded by the past year to make some further improvements, which will be pointed out in their proper places.

The difficulty of obtaining returns from some of those persons to whom applications are made still continues; and in many instances there is still a great amount of carelessness, in regard both to the making up and forwarding of the returns, which very seriously adds to the difficulties of my office. I wish, therefore, to impress upon all who are called on to furnish Statistical Returns, that a few minutes spent in checking them before they are sent in would save me very much time and labor, and not be any hardship—if indeed it were not a positive gain—to themselves. Applications for information, which might have been furnished in a few hours, have in many instances had to be repeated over and over again, and several proof sheets have been delayed in consequence. If such persons would only reflect how much their negligence or indifference increases the vast labor and anxiety necessarily, under the most favorable circumstances, involved in this work, they would, I trust, be more considerate, and show a more prompt compliance with the requests made to them.

I now proceed to offer such observations as appear to me to be useful, on the facts contained in this volume.

I.—POPULATION.

Increase of Population:

The population of Tasmania on the 31st December, 1868, is estimated to have been 100,706, being an increase of 2251 persons during the year, which is at the rate of 2·286 per cent. In 1867, the increase was only 1087, or 1·116 per cent.; and in 1866, 2167, or 2·28 per cent.; so that the increase in 1868 was the same as that of 1866, and more than double that of 1867. The increase by Immigration in 1868 was, for the whole Colony, 723; at Launceston (including out-ports) there was an increase of 888; while at Hobart Town there was a decrease of 165. In 1867 the numbers stood: at Hobart Town, increase 160; at Launceston, decrease 626. In 1866, they were: at Hobart Town, increase 347; at Launceston, increase 343.

by Immigration;

These results are more clearly shown in the following table, which is carried back five years, and shows the movements of the Population at the two ports separately:—

		ARRIVALS.	DEPARTURES.	*Resulting Increase (+) or Decrease (—) of Population.*
At Hobart Town	1864	1397	1735	— 338
	1865	1364	1914	— 550
	1866	1840	1493	+ 347
	1867	1648	1488	+ 160
	1868	1327	1492	— 165*
Total, Hobart Town		7576	8122	— 546
At Launceston and Sub-ports	1864	2314	1786	+ 528
	1865	2233	1595	+ 638
	1866	2929	2586	+ 343
	1867	1911	2537	— 626
	1868	3716	2828	+ 888
Total, Launceston and Sub-ports		13,103	11,332	+ 1771
Total, Tasmania		20,679	19,454	+ 1225

The whole number of persons added to the population by means of immigration during the above quinquennial period was only 1225, or at the average rate of 245 a year. The increase was much larger at Launceston than at Hobart Town; but this was in a measure caused by the fact that many persons prefer coming from Melbourne to Launceston, and thence proceeding across the island, to braving the additional discomforts attending the longer voyage from Melbourne direct to Hobart Town. But after making all due allowance for this, we can hardly come to any other conclusion than that the comparatively large increase of 888 at Launceston in 1868 was, in a great measure, composed of persons attracted thither by the railway works now in progress.

by Births.

The increase of Population from excess of Births over Deaths amounted in 1868 to 1528, being at the rate of 1·517 per cent. of the Population on 31 December. On a comparison with the figures given in page vi of the Report for 1867, it will be seen that so low a rate has not occurred since 1858, the furthest period to which the investigation was there carried. This was due, not to any remarkable diminution in the number of Births, but to the unusual mortality, to which more particular reference will be made under the head of "Vital Statistics." The mean increase from this source for the quinquennial period 1863-67 being 1·688, we observe that there was a declension in 1868 to the extent of 0·171 per cent.

In reference to the constant decrease of the ratio of Births to Deaths which has now been going on for so many years, it was observed in my last Report that, if the same decrease should continue to prevail, in the same degree, in little more than seven years thence all accession to the population from excess of Births over Deaths would entirely cease, and the population, so far as it is recruited from this source, would then begin to decrease. This statement excited some surprise at the time, and attempts were made to impugn its accuracy, on the assumption that in arriving at my conclusion I had overlooked the fact that a considerable number of Births are every year left unregistered. But a very slight consideration should be sufficient to show that such an objection has no weight whatever. The last census (in 1861) which was taken four years, within a few days, after the one preceding, showed an excess of about 2100 over the estimated Population, or say 525 a year. Granting then that the major part of this excess was to be put to the account of unregistered Births, that does not in any way invalidate my conclusion, for we are entitled to assume that the number of unregistered Births does not vary in any considerable degree as between one year and another. The error of defect may thus be regarded as a 'constant' (to borrow a mathematical term), and does not in any way interfere with the evolution of the law, as deduced in my former report. An analysis of the returns now before us tends to confirm the result then arrived at.

Assisted Immigration.

Fifty-six persons arrived in the Colony in 1868 as Bounty Immigrants. Of these 44 were from Ireland, 7 from England, and 5 from Scotland.

* From the Return of the Commanding Officer it appears that soldiers and their families, to the number of 244, left the Colony during the year.

While speaking on the subject of Immigration, it may be useful, for the information of persons out of the Colony, who may peruse this Report, to give a brief abstract of the provisions of The Immigration Act of 1867, 31 Victoria, No. 26. Those provisions refer to two classes of Immigrants. 1. Those who may proceed "direct from Europe to Tasmania." The conditions prescribed in this case are, that the Immigrant shall pay the full cost of the passage of himself and family; that he shall not have previously resided in the Colony; and that he shall be approved by the Immigration Agent. On satisfying these conditions, he is entitled to receive "a Land Order Warrant, which shall specify the names and ages, as well of the person to whom it is issued, as also of the Emigrant or respective Emigrants on account of the payment of whose passage money the same is issued." "Such Land Order Warrant shall entitle the holder thereof to receive, immediately on his arrival in the Colony, one Land Order in respect of each person...whose passage money has been paid in full,...and all such Land Orders shall be of the respective nominal values of £18 for each Emigrant of the age of 15 years or upwards, and £9 for each Emigrant-child between the ages of Twelve months and Fifteen years." These Land Orders are to be available to their full nominal value, in payment of the purchase money for any waste Lands purchased by the Immigrant at any Government Sale, or by selection under the Waste Lands Act.

2. The second class of Immigrants referred to in the Immigration Act of 1867, is that of persons "arriving in the Colony with the intention of settling therein, from Europe or India," as cabin or intermediate passengers. The conditions in this case are, that the passage money shall be paid by the Immigrants themselves; and that they shall not have previously received or accepted Land Orders within the meaning of the Act. Each Immigrant of this class is entitled, at any time within 12 months after arrival in the Colony, to Certificates from the Board of Immigration, authorising him to select, respectively, 30 acres of land for himself, and 20 acres for his wife, within 12 months of their arrival; and 10 acres for each child, also within 12 months of its arrival. The selections are to be made within 12 months after the date of the Certificates received from the Board, which Certificates are to be received in payment of the "purchase money of any waste Lands selected by virtue of such Certificates for purchase under the 19th Section of the Waste Lands Act, 1863."

A further condition, applying to both these classes of Immigrants, is, that they shall not receive a "Grant"—that is, a Title Deed—for their land until they have resided for five years in the Colony, if alive so long. In case of death before that period, the heir-at-law or devisee can claim the Grant, as if the condition of residence had been fulfilled. If the Immigrant leaves the Colony before the stipulated time, of course the land reverts to the Crown.

During the last year, it was proposed to appoint an Agent under this Act whose sphere of duty should be in England; but, for reasons which it is not necessary here to specify, the intention was not carried out. Mr. Buck was, however, at the close of the year, appointed an Emigration Agent for Germany, and has departed on his mission. Those who know anything of the German character must augur the best results from Mr. Buck's operations. The German peasantry are remarkable for precisely those qualities which are most deficient in our own Colonists, especially of that class which it is intended to introduce,—namely, steady painstaking perseverance, thrift, attachment to the soil, the habit of making the most of small things, and living on a little. I have myself known many instances where German Immigrants have done well in this Colony, and, from very small beginnings, have acquired property, and become naturalised subjects of the British Crown; and a large number of other similar instances were discovered by Mr. Buck, who visited many Districts in the Colony with that view. There is reason to believe that the example of a fair sprinkling of Germans among our industrial population would have a beneficial effect upon the character of the latter; and their admiration of, and attachment to, those British institutions which have been transplanted in the Colonies, together with the prevalence among them of education and agricultural training, make them especially desirable as immigrants. There is, perhaps, no other country in Europe, (save possibly Belgium), in whose people the qualities mentioned are found in an equal degree.

In England, public attention has lately been strongly directed to the subject of relieving the Mother Country of her surplus population, and various schemes have been suggested for the purpose. There seems every reason, therefore, to believe that before long a stream of immigration will flow thence to the shores of the Australasian Colonies,—Tasmania among the number; and thus we may gain that infusion of new blood which is so vitally necessary in order to repair the mischief caused by continual

exhaustion. But there is the danger of being burdened with the pauperism of the parent state to be guarded against. For, though it is true that population is our great need, yet it is equally true that that population, to bring with it any benefit, must be not only a consuming, but a producing population. Of non-producing consumers we have too many already; and all our efforts should be directed to restoring the balance.

II. Trade, Commerce, and Navigation.

Imports and Exports.

The Imports in 1868 were valued at £845,152, against £856,348 in 1867, being a decrease of £11,196.

The Exports are represented by the sum of £920,820, being an increase of £130,326 as compared with those of 1867. This is the largest increase between the Exports of any two consecutive years in the whole of the period from 1857 to 1868. Of the Exports, 98·72 per cent. in value was of articles the produce of the Colony; the value of British and Foreign produce and manufactures being only 1·28 per cent. of the whole.

The following table shows the distribution of our external trade for the last three years:—

COUNTRIES.	IMPORTS.			EXPORTS.		
	1866.	1867.	1868.	1866.	1867.	1868.
	£	£	£	£	£	£
United Kingdom	253,180	299,892	265,396	344,131	378,532	435,523
Victoria	537,878	432,347	458,073	320,626	223,879	277,797
New South Wales	72,844	49,715	46,099	70,690	70,157	111,631
South Australia	—	—	135	17,347	26,260	16,094
Queensland	3932	8875	6225	17,318	14,076	23,001
New Zealand	1485	5058	2820	57,142	75,057	50,764
Mauritius	67,278	54,051	59,367	6667	2533	5630
Calcutta	—	—	455	—	—	—
Guam	—	—	—	685	—	380
Valparaiso	—	—	2760	—	—	—
China	—	6410	3602	—	—	—
Southern Whale Fisheries	5510	—	220	—	—	—
Total	942,107	856,348	845,152	834,606	790,494	920,820

Until last year, no distinction was made in the Customs' records between goods imported direct from Victoria and those which were imported from the United Kingdom by way of Victoria. In the early part of 1868, however, instructions were given to the Collectors of Customs to return each class of goods under its proper head; and it is therefore to be presumed that in 1868 the above figures correctly indicate our commercial relations with those countries.

The commerce at the two ports, in the last three years, stands thus:—

PORTS.	IMPORTS.			EXPORTS.		
	1866.	1867.	1868.	1866.	1867.	1868.
	£	£	£	£	£	£
Hobart Town	469,255	495,030	439,540	460,735	465,990	418,810
Launceston	412,852	361,318	405,612	373,871	324,504	502,010

It will be seen that while at Hobart Town, in 1868, both the Imports and Exports were considerably less than in 1866,—the former by £29,715, the latter by £41,925,—at Launceston the Imports were less by only £7240, while the Exports were greater by £128,139. As between 1867 and 1868, the Exports at Launceston had increased by £177,506, or 64·57 per cent.; the Imports by £44,294, or 12·25 per cent.

To this remarkable increase in the Exports at Launceston the following articles contributed to the extent specified after each:—Bran, £2675; Fruit, green, £4968; Flour, £26,060; Oats, £42,475; Wheat, £19,235; Sheep (to Victoria), £3750; Oatmeal, £2182; Potatoes, £9269; Wool, £88,254.* On the other hand, there was a considerable decrease in Timber exported from the Northern side.

* *Vide* p. x.

The following Table of Imports and Exports for the past five years will render it easier to observe the changes in the amounts at the same ports.

YEARS.	IMPORTS.		EXPORTS.	
	Hobart Town.	*Launceston.*	*Hobart Town.*	*Launceston.*
	£	£	£	£
1864	549,015	359,250	506,891	468,839
1865	437,480	324,895	462,965	418,000
1866	469,255	412,852	460,735	373,871
1867	495,030	361,318	465,990	324,504
1868	439,540	405,612	418,810	502,010

Among the Imports at Hobart Town in 1868 will be found 5 packages of Coin, valued at £13,500. This is the first time for many years that any record is made of either imports or exports of Coin or Bullion. The attention of the Collectors of Customs was called by the Hon. Colonial Treasurer to the omission, and a notice was inserted in the Government *Gazette*, requesting shippers and consignees to pass entries for all Coin and Bullion received or despatched, as in the case of any other goods. So long as they neglect, or are not called upon to do so, it is evident that the Customs Returns do not furnish a true statement of our commercial relations with other countries. That there must be large transactions in the precious metals will be seen by a glance at the above table of Imports and Exports. For example: our balance of trade with the Mauritius for the three years showed a sum of £165,866 against us, which must have been remitted in specie or bullion, of which there is no mention. In like manner, the balance between Victoria and Tasmania was against the latter, so that it must have been restored by remittances of specie or bullion to Victoria; while, from the United Kingdom and New South Wales, there must have been an influx of the precious metals hither.

Consumption of Spirits, Tea, Sugar, and Tobacco.

Having been requested by the Commission on Distillation to prepare some Returns showing the quantity of Spirits imported, it may be interesting to glance at some of the results. I have extended the inquiry to some other articles of general use,—namely, Tea, Sugar, and Tobacco,—and give the quantities entered for home consumption in the Table which follows.*

YEARS.	ENTERED FOR HOME CONSUMPTION.			
	Spirits.	*Tea.*	*Sugar.*	*Tobacco.*
	galls.	lbs.	cwts.	lbs.
1858	126,942	483,275	93,310	200,423
1859	121,332	655,951	55,604	203,647
1860	111,890	818,907	55,598	191,549
1861	105,497	560,495	83,795	180,742
1862	93,536	581,884	93,070	141,287
1863	89,189	688,525	76,796	146,886
1864	81,374	697,108	45,023	155,791
1865	72,380	587,658	49,717	145,338
1866	73,078	496,332	77,380	155,485
1867	69,223	554,657	65,310	151,927
1868	66,517	611,364	67,025	158,257

The result of the enquiry as regards Spirits is very remarkable. In 1833 the consumption of Spirits was 104,637 gallons; from which time it decreased to 72,091 gallons in 1850. The influence of the gold discoveries raised it to 185,879 gallons in 1854. Since then it has dwindled down year by year with unvarying uniformity, until 1868, when it was no more than 66,517 gallons. The consumption per head of the total population was, in 1838, 2 galls.; in 1851, 1·1 galls.; in 1857, 1·7 galls.; in 1861, 1·2 galls.; and in 1868, only 0·66 gall. The decrease in Rum is the most remarkable, 68,502 galls. having been drunk in 1838 with a population of only 45,846, and only 29,086 gallons in 1868, with an estimated population of 100,706!

It is not easy to say, with any certainty, what are the causes of this decrease in the consumption of Spirits. Some have supposed that it has been brought about by the substitution of malt liquors of home produce; but here we are met by the significant fact that the number of Breweries was returned as 38 in 1858, and only 31 in 1868.

* This Table is not carried further back than 1858, because the information is not to be obtained from the published Statistics or Blue Books previously.

The emigration of large numbers of working men, the increase of 2*s.* per gallon in the duty on Rum in 1863, and the general decline in the consuming power of the people, must certainly have had a large share in causing the decline.

The consumption of Tea, Sugar, and Tobacco appears to have been so capricious, that it is exceedingly difficult to account for the irregularities exhibited. The increase on these commodities in 1868 was entirely on the Northern side of the Island.

The consumption per head of the total population was, in 1861, (the year of the last Census), of Tea, 6·23 lbs.; of Sugar, 104·31 lbs.; of Tobacco, 2 lbs. In the last five years (1864–8) the mean consumption was, Tea, 6·08 lbs.; Sugar, 70·29 lbs.; Tobacco, 1·58 lbs. In the previous five years, (1859–63,) it was, of Tea, 7·40 lbs.; of Sugar, 91·41 lbs.; of Tobacco, 1·93 lbs.

I find that in the United Kingdom, in 1867, the quantities of the above articles per head retained for home consumption was, Spirits (imported and exciseable), 0·98 galls.; Tea, 3·68 lbs.; Sugar, 40·58 lbs.; Tobacco, 1·35 lbs.* The consumption of Tea and Sugar in Tasmania thus appears to be nearly double that in the United Kingdom; and that of Butcher's Meat is certainly not less in proportion. I do not think any stronger argument could be found to prove how much better is the condition in this respect, of the people generally in this Colony than in the old countries.

Exports of Colonial produce.

Two Returns have been added in the present volume, showing the quantities and values of articles of home produce exported during the past ten years; and similar Returns will be repeated on future occasions. So much having been said about our Export trade in my former reports, it will be sufficient now to add a very few words in reference to this subject. We observe an increase in 1868 on the Exports of Bran and Pollard; Flour; Oats; Barley, (the quantity being larger than it has been for many years previously); Hops; Sperm Oil; Treenails, Spokes, &c.; Laths and Shingles (as compared with 1867 only); Sawn and hewn Timber; and Vegetables. On the other hand, there is a decrease in Bark; Butter and Cheese; Fruit; Wheat; Hides, Skins, and Leather; Horses and Sheep; Palings; Posts and Rails, &c.; Piles and Beams, &c. On Wool there is an increase so remarkable as to deserve separate mention. The quantity was greater than in any one of the ten years from 1859 to 1868. Comparing the two last years of that period, the increase amounted to 30·9 per cent. Such a result, in spite of the ravages of fluke, and the dry season in the Southern side of the Island, was so contrary to expectation, that I enquired of the Collector of Customs at Launceston whether there was not some error in the Return; but was assured that the quantity stated was correct, the increase being caused by one ship having taken two cargoes of Wool within the year, one being the clip of 1867, the other of 1868.

Before quitting the subject of our Exports, I would beg to call the attention of all persons engaged in preparing home produce for market, and especially for sale beyond the Colony, to the injury which our commerce has sustained from carelessness in this particular. Severe strictures were lately made in some of the local papers as to the state in which Grain was brought to market by Tasmanian farmers; and I have a very distinct recollection of similar complaints having been made in former years in respect to Timber. It cannot be doubted that this cause has had at least some share in the declension of our commerce; and the mischief, once done, is difficult to repair. It is therefore greatly to be desired that our producing classes will take more care in future that their goods may be presented in good marketable condition. Every man who does not do this is not only an enemy to his own interests, but also to his country. It should be remembered, that where the trade is so small as it is in this Colony, any want of confidence produces a much more sensible effect than where the transactions are on a more extensive scale.

The publication of the Board of Trade referred to in the Note to this page, affords some useful information with reference to the Imports of Wool (Sheep, Lamb, and Alpaca) into the United Kingdom between the years 1853 and 1867.

In the latter year the quantities received were—

	lbs.
From Spain	494,049
Germany	3,819,288
Other European Countries	17,172,526

* Statistical Abstract for the United Kingdom, 1853-67, published by the Board of Trade.

	lbs.
From British Possessions in South Africa	36,126,750
Ditto in the East Indies.....	15,234,620
South America	21,381,281
Other Countries	6,366,494
	100,595,008
Australia	133,108,176
Total Imports	233,703,184
Total Exports (Foreign and Colonial only)	90,832,584
Retained for Home Comsumption	142,870,600

The supply from Spain seems to be exceedingly irregular, and generally quite insignificant: from Germany it is also irregular, and apparently declining: "Other Countries of Europe" furnish a tolerably steady supply, ranging from 27 millions of pounds in 1853 to 17 millions in 1867: from South Africa it has increased from 7 to 36 millions: from the East Indies it has also increased from 12 to 15 millions, reaching 26 (nearly) in 1866: from South America the supply has been gradually rising from 10 to 21 millions: from "Other Countries" there is a small increase. The only rivals, therefore, whose competition the Australian Colonies need fear, are South Africa and South America; but even their contributions are small in comparison with those of Australia, which in another year (supposing the increase to continue) would be able, single-handed, to supply the British Market with the entire quantity required for home consumption! It is evident that the limit of profitable production has been attained, unless new purchasers can be found.

Customs Union for Australasia.

The subject of Free Trade among the Australasian group of Colonies has, I am happy to say, received a large share of public attention since the publication of last year's Report. The Chambers of Commerce of the different Colonies were invited to meet at a Conference in Sydney to consider the proposal to establish an Australasian Zollverein; and three of them, namely, Victoria, New South Wales, and South Australia, appointed Representatives for the purpose, the Tasmanian Chamber expressing its approval of the proposition by letter. The Representatives met in Sydney, and passed Resolutions affirming the desirability of carrying out such a Union; and it is now understood to have been decided that a Conference of Delegates from the Governments of the Colonies represented (including Tasmania) shall be held in October next.

The general feeling of the Colonies seems to be strongly in favor of the proposed Customs Union, and I earnestly hope that no local jealousies, or narrow prejudices, will be permitted to prevent a consummation so devoutly to be wished. In discussing the terms of such a Union, the adherents of free trade and protection will be likely to differ; but it is far better that each should make some concession, than that an arrangement so fraught with important advantages to all should be suffered to fall to the ground for any want of agreement among the Colonies.

There is one point in reference to the scale of duties to be adopted on which I feel some delicacy in touching; but it is so important, that I choose rather to incur the risk of appearing presumptuous, than to pass it over in silence. The failure of the negotiations held in 1863 with the view of establishing, among other things, a simple and uniform tariff for the Colonies represented, was caused by the want of agreement among the Legislatures of those Colonies, whose sanction was required to be given to the Tariff adopted by the Delegates before it could have the force of law. There is no reason to suppose that if the same course were again pursued, the result would be in any way different; and thus the Commercial Federation of the Colonies would almost certainly be as far from being established as it was in 1863. It would seem then, that the only course which gives any reasonable promise of effecting that object, is, that the Members of the several Legislatures who may be appointed to represent the Colonies should be invested by Act or Resolution of their respective Parliaments with full powers to settle and finally pass into law the proposed uniform Tariff: by making the Tariff subject to revisal at stated periods, say, every three years, any defects might easily be cured; and means might then be taken for the amendment of anything which might be distasteful to any of the contracting Colonies.

As the subject of a Customs Union is new to most people in these Colonies, and as few will take the trouble to examine it closely, it may be useful to enumerate, as far as we can, the advantages which it is likely to confer, not on any one section, class, or country, but on the whole group of contracting Colonies.

1. Foremost among these we must rank the harmony and unity of action among the Members of the Confederation, which will be a necessary consequence. Isolation, and antagonism of interests are serious drawbacks to the progress of Colonies so nearly related to each other as these. For an illustration of this we need only point to the injury which Tasmania has suffered in her trade from the duty imposed in Victoria on Grain, Timber, and Fruit. A Customs Union would pave the way for federal action on many other subjects, and is therefore desirable, not only for the sake of trade, but also by way of providing machinery which might be made useful for other purposes, in the event of certain possible contingencies arising. The habit being formed of acting in concert on any one subject, it would be easy to extend the principle as occasion might require.

2. The establishment of a uniform Tariff throughout the group would act as a strong stimulant to production, by removing restrictions imposed by conflicting Customs duties, and opening up a more extended market to the producer. In the sale of some articles of produce, each Colony is now almost confined to its own geographical limits; whereas a uniform Tariff, and a free circulation of goods among all the Colonies, would have the effect of extending, say, our own consumers from 100,000 to 1,700,000. The commerce of the Australasian Colonies in 1867 was as follows:—

Colonies.	*Imports.*	*Exports.*	*Total Commerce.*
	£	£	£
Victoria	11,674,080	12,724,427	24,398,507
New South Wales	6,599,804	6,880,715	13,480,519
South Australia	2,506,394	3,164,622	5,671,016
Queensland	1,715,582	2,160,340	3,875,922
New Zealand (1866)	5,894,863	4,520,074	10,414,937
Tasmania	845,152	920,820	1,765,972
TOTAL	29,235,875	30,370,998	59,606,873

It cannot be doubted that the throwing open of this trade of sixty millions to the different Colonies will have an enormous influence in developing the resources of each, and will open up many new sources of employment for labor. The present restrictions on production being removed, and the number of available consumers being multiplied—as regards this Colony—by 17, many industries may then be profitably established which at present, for want of a more extended market, would not afford an adequate return for the necessary capital; it being a well-established law, that production on a large scale is more economical and profitable than on a small scale. Production being thus stimulated, wealth, and what is called the "wage-fund," will be proportionally increased.

3. The rates of Customs Duties being assimilated, the prices of commodities and labor will, so far as they are thereby affected, have a tendency to become equalised; and each Colony will thus be left free to produce those things for which it has a special adaptation.

As all articles, however frequently they may be transported from Colony to Colony, will be chargeable with the duty only once, their cost will often be diminished, and more money will be available for the purchase of commodities, or the employment of labor.

5. The establishment of one general system of collection of Customs Duties will tend to diminish the cost of collection, and remove many sources of irritation and annoyance to the public in their dealings with the Custom Houses.

6. It will also introduce uniformity of system in the Customs accounts of the Members of the Union; and this of itself will be a great advantage for statistical and general purposes.

7. The decrease in the cost of commodities, and the encouragement of production, will tend to attract industrial population, and so to supply one of our most urgent wants.

8. The increase in consumption resulting from cheapness of commodities will cause an increase also in the Revenue; and this will go far to remove one of the obstacles to the prosecution of necessary public works.

9. The additional employment provided for the population will tend to diminish, or at least to arrest, the progress of pauperism and crime.

10. The last effect which I shall mention is as much of a moral as of a material kind. The proposed Customs Union would, more than anything else, tend to remove local jealousies. In this respect Victoria and New South Wales would be the chief gainers; and it is hard to conceive how any objection could ever have been raised in the latter Colony to an arrangement which would completely and for ever compose those disputes which for many years past have proved a constant source of irritation between itself and Victoria. The removal of these disputes would be succeeded by a healthier and more harmonious feeling; and each Colony would have a direct interest in striving to promote the prosperity of the whole group.

Such are some of the benefits which would spring from the operation of an Australasian Zollverein. The objections to it, so far as I have heard, are very few, and are urged in the interest of a few importers and tradesmen only, who do not for a moment deny that the advantage of the general community would be greatly promoted. But when these objections are dispassionately weighed, it will be found that those persons, instead of being injured by a free intercolonial trade, will in reality be as largely benefited as any other class. For, in the first place, the increased consumption will bring them a corresponding increase of business and consequent profit: in the next, the free passage of goods from place to place will enable them either to order supplies only as these are wanted, and so, by keeping lower stocks, to unlock their capital, so that it may be turned over much more frequently, thus multiplying many-fold their gains; or to send their surplus stocks to any port where there may be a prospect of making a profitable sale.

It has now, I hope, been shown that a Customs Union would confer a boon on the whole population of the contracting Colonies, without exception of any class; and I earnestly trust that the present agitation of the question will result in the early establishment of such a union.

Shipping, inwards and outwards.

The Shipping Returns for the last three years exhibit the following results:—

		BRITISH.		FOREIGN.		TOTAL.	
		No. of Vessels.	*Tonnage.*	*No. of Vessels.*	*Tonnage.*	*No. of Vessels.*	*Tonnage.*
Inwards ..	1866....	640	106,894	3	1009	643	107,903
	1867....	595	96,186	3	1204	598	97,390
	1868 ...	650	109,120	4	1433	654	110,553
Outwards .	1866....	629	105,056	3	1009	632	106,065
	1867....	629	102,141	2	613	631	102,754
	1868....	656	110,168	3	1323	659	111,491

The comparison, it will be seen, is greatly in favour of 1868.

The following were the number and the tonnage of Shipping entered Inwards at the Northern and Southern Ports, respectively, for the same years:—

	1866.		1867.		1868.	
	No.	*Tonnage.*	*No.*	*Tonnage.*	*No.*	*Tonnage.*
Hobart Town.....	227	54,568	222	49,085	223	52,201
Launceston.....	158	36,368	135	29,945	166	40,386
Ditto Sub-ports; viz.—						
Circular Head ...	98	7516	83	7850	76	5984
Port Frederick ..	73	4813	20	1629	44	3085
Leith	40	2094	77	5228	82	5044
Wynyard	44	2363	61	3653	63	3853
Emu Bay	3	181	—	—	—	—
	416	53,335	376	48,305	431	58,352

The Shipping at Hobart Town in the last three years has been declining, having been less in 1868 than in 1867 or 1866: at Launceston, on the contrary, it has

increased. As regards the Northern Sub-ports, it will be observed that at Circular Head and Port Frederick the number and tonnage of Shipping has fallen off; while at Leith and Wynyard it has increased.

Shipping registered.

The number of Ships (including Steamers) registered in 1868 was 187, against 211 in the previous year; the tonnage being, in 1868, 17,477, and in 1867, 19,751. Here, again, the advantage was on the side of Launceston: for, while Launceston gained 2 Vessels, Hobart Town lost 26.

Steamers registered.

The number of registered Steamers on 31 December, 1868, was 11, the same as in 1867. One, of iron, was struck off the Register at Hobart Town; another, of wood, being added at Launceston.

Whale Fisheries.

The Return of Whale Fisheries shows an increase in 1868 of 6 Vessels employed, with a tonnage of 1568. One hundred and fifty additional men found employment in this branch of industry in that year. The increase in Oil, the produce of the fisheries, as compared with the previous year, was—

Black Oil, 22 tuns 187 gallons, or 215·36 per cent.
Sperm Oil, 381 tuns 92 gallons, or 173·44 per cent.

The excess in the value of the produce (including 10 cwt. Whalebone) was £29,746, or 130·47 per cent. This is the most encouraging feature in the whole of the returns now under review.

Coal raised.

The quantity of Coal raised in 1868 was 9054 tons, against 8341 in 1867. The increase took place at Tasman's Peninsula and Seymour, notwithstanding that the mines at the latter place were worked only from March to December.

Prices of Provisions, &c.

The return of prices of Provisions and other articles in general use for 1868 has been enlarged by the addition of many other commodities, and the prices, instead of being taken only on the 31st December, have been taken at the end of each quarter, so as to show the limits for the whole year. Instead, however, of striking an average, and so giving rates which would in reality be fictitious, I have preferred to indicate merely the extremes, leaving the reader to strike an average, if he chooses. The returns in 1868 and former years being compiled upon different principles, it would obviously be delusive to institute any comparison between them. It may, however, be stated that, as regards the necessaries of life, Flour seems to have been dearer, having risen to £18 per ton in March quarter of 1868, the lowest price being £15 in the September quarter. Potatoes were cheaper. Beef in March quarter, 1868, was from 6*d.* to 8*d.* per lb., or about the same as in 1867; but in the next quarter, in consequence of the Graziers entering into direct competition with the Butchers, the price was from 2½*d.* to 5*d.* only, and remained for the rest of the year at from 4*d.* to 6*d.* The competition so established has since been withdrawn. The price of mutton was, of course, similarly affected.

The variations in the contract prices of some of the principal articles were as follows:—Cheaper, per cent.: Butchers' Meat, 26·4; Butter, fresh, 14·3, potted, 20; Candles, tallow, 15·4; Eggs, 11·8; Oil, black, 10·9, kerosine, 54·6; Sugar, 12·9; Tobacco, 7·7:—dearer, per cent.: Bread, 40·8; Flour, fine, 49·4; Potatoes, 7·56; Carrots, 33·3.

Trades and Manufactories.

The Return of Trades and Manufactories shows a decrease of: Baker, 1; Blacksmith, 1; Bricklayers, 14; Cabinet-makers and Joiners, 4; Candle Manufacturers, 3; Carpenter, 1; Cider-makers, 2; Coopers, 5; Corn and Ship Chandlers, 3; Engineers, 8; General Dealers, 15; Gold-beater, 1; Grocer, 1; Gunsmith, 1; Ironmongers, 2; Maltster, 1; Mill, horse, 1; Painters and Glaziers, 6; Pastrycooks, 7; Rope-maker, 1; Saw-mills, 3; Shoemakers, 35; Starch Manufactory, 1; Stone Masons, 10; Tanners, 19; Tobacconists, 4; Turners, 3; Watch-makers, 2; Wheelwright, 1; Woolstapler, 1. There was an increase of: Agricultural Implement Makers, 5; Basket-makers, 2; Brewery, 1; Butchers, 28; Chemists, 2; Dyer, 1; Fellmonger, 1; Furriers, 2; Glue and Size Maker, 1; Gunsmith, 1; Mills, wind, 2; Mills, steam, 8; Printing Office, 1; Publicans, 3; Tailors, 9; Tin-worker, 1; Vinegar Manufactory, 1.

III.—Finance.

General Revenue.

The total General Revenue in 1868 (excluding balances) was £333,069 8*s.* 3*d.*, being an increase of £60,116 8*s.* 4*d.* on that of the previous year.

The following table shows the receipts of the Customs and Inland Revenues for the past three years:—

	1866.			1867.			1868.		
	£	s.	d.	£	s.	d.	£	s.	d.
Customs (including Bonding Rents, Launceston)	129,310	12	0	127,223	17	4	132,159	1	2
Inland Revenue	47,053	2	0	56,087	8	2	53,164	8	6
Total of both	176,363	14	0	183,311	5	6	185,323	9	8

The Customs receipts (including Bonding Rents as above) were increased by the sum of £4935 3*s.* 10*d.*, but it will be observed that the Inland Revenue was £2922 19*s.* 8*d.* less than in the preceding year.

The following was the Expenditure from the General Revenue for the last three years:—

	1866.			1867.			1868.		
	£	s.	d.	£	s.	d.	£	s.	d.
Ordinary Expenditure for the year	182,363	11	2	163,695	0	3	169,624	8	5
Special Disbursements	31,592	12	7	50,303	19	9	99,328	16	8
Debentures transferred to Land Fund, &c.	—			—			64,274	12	3
	213,956	3	9	213,999	0	0	333,227	17	4
Arrears of former years	28,405	3	9	41,553	0	8	42,192	17	2
	242,361	7	6	255,552	0	8	375,420	14	6

The increase in the ordinary expenditure was due to an excess of £1085 14*s.* 2*d.* on interest of Debentures, and of £5498 15*s.* 8*d.* on "Miscellaneous" charges.

The large increase under the head of "Special Disbursements" is accounted for by a transfer in addition to that shown in the next head, of Debentures from the General to the Land Revenue. Excluding the amount of Debentures so transferred (£118,779), the total expenditure for the year will be reduced from £333,227 17*s.* 4*d.* to £214,448 17*s.* 4*d.*, which includes an excess of £4400 in the amount of Debentures redeemed, as compared with the previous year.

The Receipts of the Land Fund (excluding balance in hand on 1 January) were £187,878 9*s.* 2*d.* The receipts for the past three years were as follows:— Land Fund.

	1866.			1867.			1868.		
	£	s.	d.	£	s.	d.	£	s.	d.
Sale of Crown Lands	53,067	0	11	47,053	14	5	48,444	6	8
Rent of ditto	9223	4	8	8200	10	8	7873	10	11
Fees	2113	1	1	2380	2	5	2390	18	10
Proceeds of Debentures	23,110	0	0	64,568	0	0	127,942	0	0
Other Miscellaneous Receipts	829	5	0	2742	14	9	1227	12	9
	88,342	11	8	124,945	2	3	187,878	9	2

The amount realised by the sale of Crown Land in 1868 was somewhat larger than in 1867, but it will be observed that the Revenue derived from the rent of such land was smaller, the ravages of fluke among the sheep having caused many Crown tenants to abandon their holdings. Of the Debentures issued, £60,142 were for the construction of various Public Works sanctioned in previous years, and £61,700 for the exchange or redemption of other Debentures, under the provisions of "The Debentures Consolidation Act."

The Expenditure from the Land Fund for the last three years will be seen in the following table:—

	1866.			1867.			1868.		
	£	s.	d.	£	s.	d.	£	s.	d.
Ordinary Services.....	42,139	7	4	42,861	19	7	39,876	1	8
Debentures redeemed	13,900	0	0	17,380	0	0	16,100	0	0
New Schools, Immigration, &c.	1108	1	9	6938	14	8	4650	9	6
Public Works, Roads, Bridges, &c.	46,474	0	2	35,229	15	4	35,214	6	0
Proceeds of Debentures transferred to General Revenue ..	—			—			38,600	0	0
Arrears of former years	3119	9	7	4060	17	11	5190	2	8
	106,740	18	10	106,471	7	6	139,630	19	10

Having myself experienced considerable embarrassment in endeavouring to give a clear abstract of the Accounts of the General Revenue and Land Fund, I trust I shall not seem to overstep the proper limits of my duty if I venture to suggest that the consolidation of both Funds into one would remove the great difficulty which is now felt in comprehending the Accounts; would enable all persons interested in the affairs of this Colony to understand its financial condition more readily and perfectly; and would thus tend to strengthen its credit. The work of consolidation was most happily begun by the passing of the Act, 31 Vict. No. 9; but I would respectfully submit that that work will never be complete, nor productive of more than half its potential effect, until the whole of the Public Revenues have been thrown into one consolidated fund. The accounts might then be exhibited in so simple a form as to be readily comprehended by all. Thus, not only would they have a great advantage in point of perspicuity, but much labor, both as regards the keeping of, and reference to, the Public Cash Accounts, would be avoided.

Commissariat. The expenditure from the Commissariat Chest in 1868 was £63,057 19*s.* 8*d.*, being less by £4177 7*s.* 2*d.* than in 1867. The decrease was principally under the head of "Convict" service.

Exchange, Interest, &c. I have added this year a Return of the Rates of Exchange, Discount, and Interest, for which I am indebted to the courtesy of the Manager of the Union Bank. On London, at 60 days' sight, the purchasing price for Merchants' Bills ranged from 1 per cent. discount to par; the selling price of Bank Bills from one-half to one and a half per cent. premium. On the other Colonies of the group at sight, the purchasing rate varied from one-quarter to 1 per cent.; the selling rate from one-half to one per cent. premium. The Rates of Discount and Interest charged by the Banks varied, according to the number of days, from 7 to 10 per cent. per annum.

The interest allowed by the Banks on fixed Deposits for 12 months (which may be taken as the standard) was, in the first quarter, 5 per cent.; in the second, 4; in the third, 3. This fact, together with others that have from time to time appeared, shows that the amount of unemployed capital has been increasing. Such being the case, a favorable opportunity is now presented of establishing new industries, such as the brewing of malt liquors for exportation, the manufacture of woollen cloth, the extension of the Whale Fisheries, perhaps also the supply of the Melbourne market with fish as an article of food, and the utilisation of our woods for ornamental purposes. The operatives discharged from the dockyards in England might possibly be advantageously employed in ship-building here. By means of cheap capital, our extensive coal measures might be made to yield their wealth; and as the progress of railway works in the different Colonies must cause an increasing demand for iron, it might be worth considering whether the manufacture of that metal might not be profitably carried on in this Colony.

Banks, The following were the average Assets and Liabilities (excluding minor items) of the Banks in the last three years:—

	ASSETS.		LIABILITIES.	
	Coin and Bullion.	*Debts due to Banks, including Notes, Bills of Exchange, Stock, funded Debts, &c.*	*Notes in Circulation.*	*Deposits.*
	£	£	£	£
1866.....	171,485	1,039,105	83,325	662,420
1867.....	151,952	1,039,521	75,367	628,056
1868.....	171,382	1,065,490	76,490	750,754

The comparison is, on the whole, favorable to the year 1868, particularly as compared with 1867, inasmuch as it shows that our wealth, or rather, that proportion of it which is represented by these figures, had increased; but the increase in the amount of Deposits without a corresponding increase of paper money, indicates what we have before inferred, that capital could not find ready and profitable investment.

Savings' Banks.

The particulars of most interest in the Savings' Banks Returns are compared for the same three years in the following table* :—

	Average Amount to Credit of Depositors.	*Average Amount to Credit of Reserve Fund.*	*Total Amount of Deposits during the Year.*	*Total Amount of Repayments during the Year.*
	£	£	£	£
1866.....	199,429	21,426	—†	—†
1867	193,093	22,887	101,646	102,924
1868.....	194,960	23,152	111,466	105,266

Here again, the comparison between 1867 and 1868 is favorable to the latter, the amount of Deposits having increased by about £10,000, and the excess of Deposits over Repayments being £6200, whereas in the preceding year the Repayments exceeded the Deposits.

Post Office Money Orders.

The number of Post Office Money Orders issued in 1868 was 3378, the amount of which was £13,070 1*s.* 9*d.*; the number paid was 2512, the amount of which was £10,719 9*s.* 10*d.* In 1867, the number issued was 3319, the amount being £12,729 0*s.* 11*d.*; the number paid was 2412, the amount being £10,032 17*s.* 5*d.* One additional office, at Green Ponds, was established on 1 September, 1868.

Gold Mining.

The Return of Gold Mining operations in 1868 is very far from satisfactory. It is true, the produce of Alluvial Digging *appears* to have increased from 144·3 ozs. to 245·35 ozs., but as there were on an average 2 men less employed, it may be inferred that the additional quantity is to be accounted for by supposing that a more accurate account has been kept of the Gold produced. As regards the Quartz Mines, the Fingal Company was not at work during any part of the year; and the statement furnished by the Union Company shows a decrease of 4269 in the number of Tons of Quartz crushed; of 454·5 ozs. in the quantity of Gold produced; and of £1050 11*s.* 6*d.* in the value. The average yield, as returned by this Company in 1868, had however increased to more than double what it was in 1867, being 7 dwts. 3·67 grs. instead of 3 dwts. 6·5 grs. But although one Company had thus stopped working, and the other had contracted its operations, it is not to be inferred that the reefs at Fingal have been exhausted. The fact seems to be that they have not yet been properly explored; and a new reef is understood to have been lately discovered, which is said to present very satisfactory indications.

Public Debt.

The Public Debt of this Colony on 31 December, 1868 (consisting of Debentures actually issued) was £1,027,400, of which £300,000 were for the construction of the Launceston and Western Railway, and, though issued under the auspices of the General Government under a re-guarantee as to the payment of interest, were for the purposes of a private Company. Deducting this £300,000, therefore, as forming no part of the debt incurred for Government purposes, the actual indebtedness of the Public Treasury on 31 December last was but £727,400, or £7 4*s.* 5½*d.* per head.

IV.—Establishments and Institutions maintained or assisted by Government.

Post Office.

The Post Office Return shows that in 1868 there were received: Letters, 427,956, or 4806 more than in 1867; Newspapers, 314,373, or 9991 more than in 1867: despatched, Letters, 381,117, or 3070 more than in 1867; Newspapers, 800,615, or 93,214 (being 13·18 per cent.) more than in 1867. The Town and District Letters in 1868 were 94,612, an increase of 2127. The Post Office Revenue in 1868 shows a trifling decrease; the Expenditure a small increase.

Electric Telegraph.

The number of paid Messages transmitted by Electric Telegraph in 1868 was 3269, against 3388 in the previous year; the amount received for them, £682 8*s.*, against £601 14*s.* 2*d.* The expenditure on account of this service was £1679 17*s.* 4*d.*, against £1281 0*s.* 3*d.* in 1867. The number of Stations and of persons employed was

* Fractions omitted. † Return incomplete.

the same in both years. The Submarine Cable connecting telegraphically Tasmania and Victoria having been successfully laid, and being now in good working order, it may reasonably be expected that the receipts in the present year will be considerably augmented.

Penal and Charitable Institutions.

Passing over some minor Returns, we come to the Institutions maintained, wholly or partially, by the Government. The expenditure on these in the last two years was as follows:—

	CHARGEABLE TO			
	Imperial Government.		*Colonial Government.*	
Penal.	**1867.**	**1868.**	**1867.**	**1868.**

Total of Penal and Charitable Institutions	17,217 18 1¾	17,909 5 8	47,849 10 5¾	47,595 9 11

Volunteers.

The number of Volunteers on the books on 31st December, 1868, was 262, of whom 165 were on the Southern side, and 97 on the Northern. The expenditure for the year was £2294 8*s.* 7*d.*

Aborigines.

The number of Aborigines in the Government establishment was the same as in the preceding year, the expenditure being considerably less. Since last year, the only surviving male of the race has died, so that now only two females are left.

Boards of Works.

The Return relating to Boards of Works shows an amount of £18,437 9*s.* 7*d.* at the disposal of the Boards during the year; an expenditure of £9170 2*s.* 8*d.*; and an unexpended balance at the end of the year of £9267 6*s.* 11*d.*

Road Trusts.

The mileage of Roads under the control of the different Trusts in 1868 is stated to have been 2475¼; the amount of Rates, Tolls, and certain other receipts, £13,126 14*s.* 4*d.*; the aid from Government, £5867 12*s.* 5*d.*, making, with the balance from last year, a total of revenue of £24,170 0*s.* 7½*d.* The expenditure was: in Salaries to Clerks, Collectors, and Treasurers, £1036 6*s.* 1*d.*; on Roads, £17,077 12*s.* 10½*d.*; other expenses, £2534 1*s.* 5*d.*; making together, £20,648 0*s.* 4½*d.*

Municipalities.

In the Municipalities of Hobart Town and Launceston there appears a decrease of £1307 on the annual value of rateable property, which in 1868 was £168,844. The receipts were: from Rates, £23,498 13*s.* 3*d.*; from Government, £1668 8*s.* 7*d.*; from Fees, Fines, Licences, &c., £2024 14*s.* 3*d.*; from other sources, £9198 13*s.* 11*d.*, making, with balance, a total of £36,990 5*s.* 2*d.* The expenditure was: for Municipal Salaries, £2546 13*s.* 4*d.*; for Police, £3244 6*s.* 2*d.*; for Miscellaneous purposes, £29,819 13*s.* 1*d.*; total, £35,610 12*s.* 7*d.* In the Rural Municipalities the value of rateable property had increased from £390,956 to £400,532; the amount of Rates from £11,225 (omitting fractions) to £13,711; while the aid received from Government fell from £9472 to £3210. The expenditure differed but little in the two years, that for 1868 being—on Municipal Salaries, £4639; on Police, £13,077; Miscellaneous, £5176; total, £22,892.

* Net Cash Expenditure, not deducting Milk supplied to other Government Establishments.

V.—Crown Lands, Agriculture, &c.

Crown Lands leased.

The acreage of ordinary Crown Lands leased in 1868 is stated to have been 669,690, yielding a rental of £6736 7*s.*, showing a decrease in the acreage of 68,892, or 9·33 per cent., and in the rental of £326 16*s.* 9*d.*, or 4·63 per cent. The average rental per 100 acres was thus £1 0*s.* 1¼*d.* against £0 19*s.* 1½*d.* in 1867. The acreage of islands under lease was 823,678, being less than in 1867 by 34,803, while the amount of rental was nearly the same.

Crown Lands sold.

Of Crown Lands sold, the number and acreage of Country Lots in 1867-8 are shown below.

COUNTRY LOTS.

	50 Acres.		*50 to 100 Acres.*		*100 to 500 Acres.*		*Above 500 Acres.*	
	No. of Lots.	No. of Acres.	No. of Lots.	No. of Acres.	No. of Lots.	No. of Acres.	No. of Lots.	No. of Acres.
		A. R. P.		A. R. P.		A. R. P.		A. R. P.
1867 ...	169	5271 2 39	75	5385 0 25	36	8036 3 6	13	10,890 1 28
1868 ...	125	4095 1 27	66	4608 0 29	44	9944 0 31	6	4424 0 0

There was a considerable decrease upon all the classes, except that from 100 to 500 acres, upon which there was an increase in the number of Lots of about 22 per cent.

A comparison of some other particulars is shown in the following Table :—

YEAR.	COUNTRY LOTS OF ALL CLASSES.				TOWN AND SUBURBAN LOTS.			
	No.	Acreage.	Purchase Money.	Average Price per Acre.	No.	Acreage.	Purchase Money.	Average Price per Acre.
		A. R. P.	£ *s.* *d.*	£ *s.* *d.*		A. R. P.	£ *s.* *d.*	£ *s.* *d.*
1867..	293	29,584 0 18	23,457 1 7	0 15 10¼	135	586 3 37·6	2369 12 0	4 0 10¼
1868..	241	23,071 3 7	21,930 6 10	0 19 0	61	299 2 7·7	1185 12 0	3 19 3

These figures speak for themselves; but it may be remarked, that the decrease upon the number of Town Lots amounted to 54·8 per cent.

Agriculture and Live Stock.

The Agricultural and Live Stock Returns, having been delayed beyond their usual time, will be published as an Appendix to this Volume. In the last Session of Parliament, the Vote for the expenses of collection of the Agricultural Statistics was increased from £200 to £300; and it became incumbent on me to devise a system by which those Statistics might be made more accurate and trustworthy. The increase was too small to allow of any radical change being made, even if it were desirable, and it was therefore necessary to confine the alterations within certain limits. New forms were carefully elaborated, and issued, with full directions, to the collectors, who were enjoined to use every possible means to ensure accuracy in collecting and compiling the particulars. The plan now adopted is this. There is first a large sheet on which the names of the parties, the acreage, produce, and live stock are entered. The totals of these sheets are then entered in another form, which shows some particulars more conveniently than they could have been arrived at on the first form. This plan, while it ensures greater accuracy, creates a much larger amount of work than the old system. When received at my Office, the totals are checked, and if any errors are detected or inferred, they are at once corrected, or referred to the Collectors for information, as the case may require. This system, although a great improvement on the former, is still defective in one point,—that of time. The forms were sent out this year in the middle of March, but there has been great delay in returning them, those for Sorell, Glenorchy, and Hamilton having been received only on the 12th, 20th, and 21st instant respectively, and those for Richmond not having been received up to the present time. In order to obviate this difficulty, I proposed, in a Memorandum which I had the honor to submit to you, on 14th June last, to adopt the method now in use in South Australia and Victoria. If this suggestion should be approved, a Schedule will be presented by the Collectors to every grower of crops or owner of stock to be filled up, as in the taking of a Census, and returned. When the Schedules are returned with the required information, they will be entered by the Collector on the form now in use, and the latter will be dealt with as at present.

A limited time, say fourteen days, after the 31st March will be allowed for the collection of the Schedules, and the compilation of the Returns. But in order to carry out such a system, it is absolutely necessary that a sufficient number of Sub-Collectors should be employed to finish the work within the appointed time; and for this purpose a more liberal vote would be required. After consulting with the Inspector of Police, whose intimate knowledge of the different districts makes him well qualified to offer an opinion, I named in my estimate for 1870 the sum of £800, which I believe will cover the expense of collecting and compiling the Statistics in the districts, and also of the extra clerical assistance which will be required to check and reduce them in my own Office. The sum voted for this purpose in South Australia is £1500, about £350 of which is required for the Office work,—checking the Schedules and compiling the Returns. The conclusion to which I have been led by the compilation of the present returns is, that under the existing system, while a considerable degree of accuracy may be secured, the work will never be performed with proper despatch; and it will therefore remain for the Legislature to decide whether it will regard the early publication of the Agricultural Statistics as of sufficient importance to justify the expenditure of such a sum as is necessary to effect it.

The work of the Collectors has, as a general rule, been better performed this year than in former years, but in some cases there are still evidences of want of proper care; and in a few districts, in consequence of the forms not having been properly understood, the particulars have had to be taken a second time, which has of course been one cause of delay. Some of the Collectors, however, have taken much pains to make their work correct and complete; among whom are those at New Norfolk and Deloraine. Their returns were in the highest degree satisfactory, and reflect great credit upon the compilers.

I requested the Collectors to furnish general reports upon the state of Agriculture, &c. in their several Districts, and many of them did so. Extracts from these reports are published in the Appendix following the ordinary Returns.

These reports, together with the Returns, show an absence of all improvement among the agriculturists. The hop-growers of New Norfolk are the only exception. They have formed an association for the purpose of collecting and imparting information, from which much benefit must, if the association is energetically supported, result to the promoters and the Colony. I have already advocated the formation of similar combinations among agriculturists generally, and hope that so good an example will be followed by them.

But, beneficial as the establishment of such societies or associations would be, it would not supply the great want—systematic instruction in the principles and practice of agricultural science. This can only be imparted through the channel of school-teaching, or a regular course of lectures,—the one being for the rising generation, the other for adults. Such a course of instruction, it appears to me, might be made, in Country Districts, to form a part of our present Public School System, without incurring any additional expense beyond that which would be necessary to provide a few requisites,—namely, class books, prints of farm implements, &c., such as are published by the Irish National School Commissioners. To make the system complete, where the teacher might be competent to do so, evening lectures on elementary agricultural chemistry, improved methods of cultivation, common errors of bad farming, and other topics connected with the subject, should be delivered for the benefit of those who could not be reached by the ordinary school instruction. The children should be required to devote a part of their time to the actual work of cultivation; and where there is no school reserve available for the purpose, a convenient plot of ground might be rented. In many places land would either be offered rent free, or given, for so useful an object. In this way, not only would the scholars acquire a large amount of practical and scientific information, but they would also learn *to work*, and so would form habits of industry and manual labor. When we consider that no wealth can be produced without labor of that kind, surely the importance of industrial training cannot be overrated. If anything were wanted to add force to such a consideration, it would be found in the troops of children who now infest our streets, in whom idleness and vice are doing their work, and raising up a generation of beggars and criminals who will at no distant date become an intolerable addition to the burdens—heavy enough already—of crime and pauperism bequeathed to us by the policy of the Imperial Government.

It may conduce to a more careful consideration of these suggestions, if we take a survey of what is being done in the way of agricultural instruction in some other countries.

Agricultural Education in Ireland.

In Ireland there were, in 1866, under the control of the Commissioners of National Education, one model farm at Glasnevin, County Dublin, and 19 School farms, the receipts and expenditure of which are shown below.

Receipts.	£	s.	d.
Albert Model Farm, Glasnevin	1957	4	3
19 School Farms	3347	19	7
Total Receipts	£5305	3	10

Expenditure.	£	s.	d.
Albert Model Farm	4634	9	10
19 School Farms	7262	11	8
	11,897	1	6
Miscellaneous Expenses, Agricultural Department	1672	8	7
Total Expenditure	£13,569	10	1
Balance, being Net Expenditure on Agricultural Instruction	£8264	6	3

The Commissioners report: "The total number of School farms in connection on the 31st December, 1866, was 109,* of which 20 were School Farms of the First Class, under the exclusive management of our Board, and 18 were School Farms of the First Class under local management. Of the remaining number, 66 were ordinary School Farms, and 5 were School gardens,—one of the latter being under our own management."

In these Agricultural Schools the Inspector has drawn up, and caused to be suspended in each School, "a list of the principal errors of Irish husbandry," the substance of which is either committed to memory by the pupils, or used for the purpose of a dictation exercise. The beneficial effect of thus impressing the essentials of good husbandry on the minds of the students in early life can hardly be overrated.

The Inspector of Irish Agricultural National Schools concludes his Report for 1866 in the following words, which apply quite as strongly to the wants of this Colony as they do to those of Ireland,—perhaps, indeed, more so: "I have no hesitation in saying that, if correct and rational ideas on the leading principles of husbandry can be impressed on the minds of the rising generation of farmers, through the teaching and example of correct practice afforded by the Agricultural Schools, the latter will return to the country a thousandfold the amount annually expended on their maintenance. The annual loss or deficit in agricultural produce, resulting from ignorant and injudicious management in a few of the matters to which I have referred, such as the rude and unskilful modes of sowing and harvesting grain crops, treatment of the hay crop, management of manure, injudicious treatment of live stock, &c., may be reckoned by millions. The only sure and certain mode of preventing this loss, and of thereby securing a vast addition to the products of our national industry, is by widely diffusing industrial intelligence of a character adapted to the capacity and peculiar circumstances and requirements of our industrial population. The agricultural industry of this country wants many improvements to unfetter, properly direct, and fully develop its energies and resources; but the great and *primary* want is *sound industrial intelligence.* This want it is the aim and object of the Agricultural Schools to supply; and if they accomplish their mission, as they promise to do, in an effective and economical manner, it will hereafter be admitted, even by those who are now the most sceptical as to their utility, that they have done vast service to the country, and have deserved well the moderate amount of support given them by the State." †

In the United States.

In the United States liberal provision has been made for agricultural instruction. The following account of it is extracted from the evidence given by the Rev. H. S. Earl before a Select Committee of the House of Assembly of South Australia, in 1868:—"In 1862 there was passed an Act in Congress granting 30,000 acres of land in scrip for

* The whole expense of which is included in the above statement.

† Report of Commissioners of National Education in Ireland for 1866. Among other school books named in the Report are the following:—Agricultural Class Book; Dr. Hodges' First Steps in Agricultural Chemistry, and First Lessons in ditto; Johnston's Catechism; Murphy's Agricultural Instructor, &c.

each senator and representative of each State, for the establishment of an agricultural and mechanical College. The tuition is free in this College, and, of course, the things taught there have a particular bearing upon mechanical and agricultural matters. The object is to give students all the information that can be given in these departments; and, in connection therewith, the students have an opportunity of laboring a certain number of hours each day to enable them to pay their board. In this way, by laboring and by obtaining a certain number of hours' study, they get a first class education. In Kentucky this has been put into successful operation. It is placed in connection with the Kentucky University—made one of the Colleges of that University; and the State having eleven senators and representatives, it has scrip for 330,000 acres of land. The scrip is sold, the money invested, and the proceeds applied for the maintenance of the College; and in that way, through the grant from Congress, it educates 300 students." Each State has "its own agricultural and mechanical college. They avail themselves of the offer with certain restrictions. The State has to furnish a certain amount itself besides. One hundred thousand dollars, I believe, were required from the Kentucky Legislature, and they just handed that responsibility over to the Kentucky University, which guaranteed the amount. It is just the same thing—it does not cost the State anything at all."

In Upper Canada.

In Upper Canada there is a Minister of Agriculture and Statistics, and a Board of Agriculture. The Report of the Board for the year 1866 furnishes the following information:—The amount of prizes offered by the Board at the Provincial Exhibition of 1866 was 12,712 dollars; the amount awarded, 10,288½ dollars; and the number of entries, 6279. There were 264 township or branch Agricultural Societies, which had "received, in subscriptions from their Members, up to the time of applying for the Public Grant, the sum of 39,254·30 dollars, and from the Public Funds the net sum of 44,630·76 dollars, all to be applied to the purposes for which they are established by Statute." Agricultural instruction is provided by the Board; and its effects are thus referred to:—"Professor Buckland has, during the past year, in a number of successive towns, visited and lectured at public meetings in the following counties; viz.—Essex, Kent, Lambton, Perth, Huron, Middlesex, Oxford, Brant, Halton, Peel, Simcoe, York, Ontario, Durham, Northumberland, Renfrew, Carleton, Russell, Lennox, and Addington. In this useful labour he has occupied twenty-three weeks' time, and has held eighty-three meetings, at which the attendance has been from forty or fifty to one hundred and fifty or two hundred persons each meeting. He has besides, had much personal intercourse with farmers in the above counties, and a few others where meetings were not convened. He has found, and has endeavoured to encourage, an active desire to acquire a knowledge of the most improved system for developing the resources of the land, and has also endeavoured to promote a spirit of intercourse and mutual co-operation and inquiry amongst the farmers in the more remote districts. Amongst other subjects, he has specially brought to the attention of his auditors the importance of the improvement of stock by using pure-bred male animals; the better and more thorough cultivation of land, by applying the labour to a less surface, and leaving a larger amount in pasturage; the advantages and means of pursuing dairy husbandry, flax cultivation, &c. &c. His lectures have been looked forward to by the members of Agricultural Societies and others with much interest, as a means of acquiring valuable information, and have been, as a general rule, well attended.

The Veterinary School continues in successful operation, in connection with the course of agricultural lectures given by Professor Buckland, assisted by other Professors of the University, to occasional students, each winter. At the recent session there were in attendance seventeen students, of whom thirteen were studying veterinary science with the view of practising it as a profession."

In Prussia.

"Prussia maintains four Royal Academies of Agriculture, at which both the theory and the practice of farming are taught in a course lasting two years, and costing each student less than £8 a year for instruction in political and rural economy, based on statistics in farming, and the management of trees and words; in the mode of manufacturing sugar, beer, bricks, and draining tiles; in mineralogy, geology, botany, and chemistry, &c. For the amateurs a less practical instruction is provided at institutes attached to the Universities of Halle and Berlin. Below the Academies are nineteen provincial Schools of Agriculture, subsidized by the State to the aggregate amount of about £2000, and for the most part kept by some large farmer, assisted by the neighboring apothecary, schoolmaster, and veterinary surgeon. There are further in Prussia numerous special 'Schools' for particular branches, such as market-gardening, and the cultivation of meadows and woods; and the care of fruit-trees is taught in 134 schools in the ancient provinces alone. The system of paid instruction is completed by the curious institution of wandering teachers, who circulate from village to village, criticising the cultivation, and giving advice about rotations of crops and the most suitable kinds of manure.

But this is not all. The State maintains seven experimental institutes of organic and agricultural chemistry, which on different soils and under different circumstances are engaged in verifying and completing the theories of Liebig, and in testing the purity of the artificial manures of Commerce. Last come no less than 519 voluntary agricultural associations, which by conferences, exhibitions, and prizes assist in spreading information. Apart from the academies and institutes of chemistry little is done by the State either to excite or direct private action. There is a central commission presided over by a Minister of agriculture, but its expenses in 1862 amounted to no more than £177."*

In Austria.

In Austria, "throughout the Empire special institutions exist for agricultural education, carefully adapted to the several grades of students, and also to the different branches of rural economy. These are supported chiefly by liberal subsidies from the State—by the provinces or districts in which they are located—and (to a small extent) by private means." These institutions are ranged under the following classes:—1. Higher Agricultural Institutions, of which there seem to be 10. 2. Farm Schools, of which there are 14. 3. Higher Forest Schools, 5 in number; with other Schools for special subjects. Regular courses of agricultural lectures are given in the Universities of Vienna and Prag, and in 14 other institutions. By these means about 300 teachers are enabled to give instruction to some 2500 students. The subsidies from the State vary in amount from 1000 to 10,000 florins per annum. The students' expenses are kept as low as possible. In the higher schools the students are not found board and lodging; but in the lower schools these are provided, and at a very economical rate. Of Agricultural Societies and Unions there are 119, with about 80,000 regular members. "Of these, 52 are specially devoted to husbandry, 10 to forestry, 21 to garden, fruit, and vine cultivation, 10 to horse and cattle breeding and management, 15 to silkworm breeding and management, 6 to bees, and 5 to fish cultivation." The head and centre of all the Agricultural Societies is the Imperial Society, which grants assistance to the local Societies. There are 50 regular agricultural periodicals published, either monthly or weekly.†

In Victoria.

The Colony of Victoria has sought to promote the interests of agriculture by an annual grant of £6000, which is expended by the Board of Agriculture; and there is also a Model Farm.

Many other examples might be added to the above, did time and space permit; but enough has been said to show that it is the interest of every State, by some means or other, to seek to educate its people in the principles and practice of scientific and economic agriculture. The two chief ends to be attained by such an education are, 1. to diminish the cost, and to increase the profit of production; 2. to preserve unimpaired, or even to enhance, the fertility of the soil. Surely in these things, more than in any others, is to be found the germ of national prosperity.

VI.—Law, Crime, &c.

Committals.

The number of Committals for Trial in 1868 is stated to have been 178 (or, as it is given in another Return, p. 139, 168), being 49 less than in 1867. The decrease is believed to have been caused by a change in the mode of dealing with such cases.

Persons tried in higher Courts.

The number of persons tried before the Supreme Court was 87, against 127 in the previous year, being 40 less. In the Recorder's Court there was an increase of 5. In both cases, the proportion of offences against the person had considerably increased.

Executions.

One Criminal was executed during the year. There were no executions in 1867 or 1866.

Litigation.

In the Supreme Court, in its ordinary jurisdiction, the number of Writs issued was 349, being 89 less than in 1867; the number of Civil Cases tried, 15, or 2 less. Under "The Small Debts Act" the business of the Court had also considerably diminished.

In Courts of Requests, under the same Act, the amount of litigation had somewhat increased, the increase being entirely in the Ten Pound cases.

Magisterial cases.

The Return of persons dealt with by Magistrates in 1868 shows the following results:—Apprehensions, 4440, or 235 less; appeared on Summons, 3034, or 313 more; Cases not proceeded with, 712, or 19 less; discharged, 1071, or 45 more; convicted, 5125, or 103 more; Orders for payment of Money under "The Magistrates Summary Procedure Act," 1423, or 347 more.

---

* *Pall Mall Gazette*, quoted in Journal of Statistical Society, Dec. 1867.

† Professor Wilson's Report on Agricultural Exhibitions at Vienna in 1866.

Probates, &c. The number of Probates of Wills granted in 1868 was 67, against 53 in 1867; the amount of sworn Property, £173,606, against £118,335. Much of this increase was probably caused by the substitution of a Probate for a Succession Duty, the latter duty having in many cases not been paid as it fell due. Letters of Administration to the number of 19 were issued, against 21 in 1867, the amounts represented being £20,250, and £24,087 respectively.

Insolvencies. The total number of Insolvencies in 1868 was 63,—in 1867, 107. The Scheduled Assets were £32,270—in 1867, £47,806; the Liabilities, £50,488, against £95,731 in1867.

Mortgages. The number of Mortgages registered in 1867-8 under both systems was—

	NUMBER.		AMOUNT.					
	1867.	1868.	1867.			1868.		
			£	s.	d.	£	s.	d.
Under the old system.....	222	251	122,198	16	5	156,310	13	4
Under Real Property Act.....	86	102	37,942	0	0	30,471	0	0
	308	353	160,140	16	5	186,781	13	4

Lands' Titles Office. The business of the Lands' Titles Office decreased considerably in nearly all matters except those relating to Mortgages; the number of Grants registered having fallen from 206 to 138.

Grant Deeds enrolled. The number of Grant Deeds enrolled in the Supreme Court also fell from 449 to 434. These results, together with the Survey Office Returns, show a great decrease in the desire or ability to purchase land.

Inquests. The number of Inquests on Deaths held in 1868 was—Males, 120, Females, 50,—together, 170, against 150 in 1867.

Public Schools, &c. The Return of Public Schools shows that there were in 1868, 8746 distinct Scholars on the Rolls; that the average number on the Rolls was 5649; that the average daily attendance was 4272. The number of Teachers and Assistant Teachers was 172; the Pupil Teachers, 34. The amount contributed by the State was £10,978 7*s.* 11*d.*; and that received for School Fees, £3905 7*s.* 7*d.*; the average amount of Government aid per annum for each Scholar in daily attendance being £2 11*s.* 10¼*d.*

The expenditure connected with the Tasmanian Scholarships was £817 3*s.* 8*d.*; with School Exhibitions, £597 12*s.* 4*d.* The total expenditure on Education borne by the State was therefore £12,393 3*s.* 11*d.*, or 2*s.* 5½*d.* per head of the whole population per annum.

Ecclesiastical. The Returns in reference to Churches and Sunday Schools are still, I am sorry to say, extremely imperfect. The particulars relating to the Church of England had to be collected from the published proceedings of the Synod, the Returns sent in to the Secretary being found to be worthless; but there appears reason to hope that better results may be looked for in another year. Many Ministers of other denominations, to whom circulars were sent, either from indifference or disinclination to furnish information, neglected to comply. In regard to the Wesleyan Methodists, although the Chairman of the District has shown every disposition to supply the information sought, he informed me that he was unable to do so on this occasion.

Friendly Societies. The abstract of the Returns filed in the Offices of the Clerks of the Peace by the various Friendly Societies shows the number of Members at the end of 1868 to have been 2043; the Receipts, £4260 12*s.* 1¾*d.*; the Expenditure, £3802 7*s.* 5¾*d.*; and the Capital of the Societies, £14,493 16*s.* 0¾*d.* Some of the Societies did not file Accounts, as required by law, and these figures must not therefore be regarded as complete.

VIII.—Vital Statistics.

Births. The number of Births registered in 1868 was 2990, being only 19 more than in 1867. The rate per 1000 of Population in the last three years was—

In 1866.....	28·81
In 1867.....	30·18
In 1868.....	29·69

The Birth-rate in 1868 was therefore slightly less than in the previous year, but somewhat in excess of the rate for 1866.

The proportion of Births of Males to those of Females in 1868 was 104·51 to 100.
In 1866 it was 104·12 to 100; and
In 1867 „ 102·66 „

Deaths.

The Deaths registered in 1868 (including two which occurred beyond the limits of the Colony) were 1464, being 46 more than in 1867. Besides these, there were 6 deaths of Convicts under sentence at Port Arthur, and one execution (of a male), which were not registered. Taking into account these seven deaths in 1868, the Death-rate in the last three years was—

In 1866, 13·63 per 1000.
In 1867, 14·36 „
In 1868, 14·61 „

The Death-rate in 1868 was higher than in any year since 1864. The Deaths of Males, including those unregistered, were 893, and of Females, 578, being in the proportion of 154·5 Males to 100 Females. The Deaths of Children under one year were in the proportion of 23·86 per cent. of the whole number. In 1866 the proportion was 19·89 per cent.; and in 1867, 18·90. The mortality among infants in 1868 was therefore considerably in excess.

The 1464 Deaths are classed as follows :—

	NUMBER.		PER CENTAGE OF TOTAL OF EACH SEX.	
	Males.	*Females.*	*Males.*	*Females.*
I. From Zymotic Diseases	151	119	17·04	20·59
II. From Constitutional Diseases ..	96	112	10·84	19·38
III. From Local Diseases	413	230	46·62	39·79
IV. From Developmental Diseases	119	86	13·43	14·88
V. From Violence	99	22	11·17	3·80
From Unspecified Causes ...	8	9	0·90	1·56
All Causes.....	886	578	100·00	100·00

Meteorology.

Health and disease are in a great measure affected by the state of the atmosphere; and a knowledge of this is necessary in interpreting the records of mortality. I have therefore added, on the present occasion, an abstract made by myself from Returns furnished to the Royal Society of Tasmania of the results of observations for the year 1868 by Mr. F. Abbott.* We are thus enabled, not only to ascertain the Meteorological conditions in the past year, but also to compare them with the means for 25 years.

The mean pressure of the air in 1868, at the temperature of 32°, was 29·912, the 25 years' average being 29·807. The mean temperature in 1868 was 56·06, being 1·61 degrees above the average; the mean diurnal range, 21·98, or 4·12 degrees above the average; solar intensity, 96·27, or 3·28 in excess; terrestrial radiation, 42·98, or 0·12 in excess; mean position of dew-point, 45·42, or 0·03 below the average; humidity of air, 0·71, or 0·04 below the average; elastic force of vapor, 0·317, or 0·002 in excess. Rain fell on only 113 days, the average number being 145·27, or 32·27 more than in 1868; and the total rain-fall was 18·08 inches, being less than the average by 4·57 inches. The mean quantity of ozone in the atmosphere was 7·64, against an average of 7·18. The total wind-force was 630·28 lbs. per square foot, against an average of 755·78 lbs. June was a singularly still month, the total wind-force being only 8·06 lbs.,—less than one-third of the average.

The air being thus found to have been hot and sluggish, it is not difficult to account for the excess in the mortality. This, however, must have been checked in some degree by the excess of ozone, and by the dryness of the atmosphere.

Diseases, &c. in Charitable Institutions.

Although, for convenience in printing, the Return of Diseases and Deaths in Charitable Institutions is placed after the Returns of Marriages, it will be better to consider it first. I shall content myself with observing, that the total number of cases of Disease treated is stated to have been 1894, and the number of Deaths 200, or 10·56 per cent. In 1867, the cases were 2266, the Deaths, 216, and the per centage of Deaths, 9·53. In the Queen's Asylum there has not been any death during the last three years.

* *Vide* p. 175.

Marriages. The number of Marriages registered in 1868 was 654, being an increase of 57 as compared with that in the preceding year. The ratio of Marriages to Population at the end of the year was 6·49 per 1000, being greater than in 1866 or 1867, when the ratios were 6·20, and 5·86, respectively.

Vaccination. The number of persons vaccinated during 1868 in the Hospitals, and in the Queen's Asylum, was 95, of whom 82 are stated to have been inspected on the eighth day after the operation. Seventy-four cases are said to have proved in every respect successful.

IX.—Miscellaneous.

Political Franchise. The number of Electors for the Legislative Council at the end of last year appears to have been 2232, 150 having been struck off, and 115 added to, the Rolls during the year. As regards the House of Assembly, the Electors on the Rolls at the end of the year, as stated by the different Returning Officers, numbered 11,367, 1474 having been removed from, and 1614 added to, the Rolls. These numbers must, however, be regarded as only approximate, those relating to the House of Assembly exhibiting some manifest errors, which, in the present state of the law, I am not able to correct. I would suggest that whenever the Electoral Act is amended, a provision should be introduced, requiring the Returning Officers to show at the foot of the new Rolls the following particulars:—Number of Electors on former Roll; number struck off therefrom; number added to new Roll; total number on new Roll. There would then be no difficulty in obtaining accurate information in this respect.

The Meteorological Returns have already been made the subject of remark under the previous head.

Conclusion.

The returns contained in the accompanying volume afford better ground of hope, and of confidence in the future of this Colony, than any which have appeared in the Statistical Records for many years past. One of our most important and profitable industries—Whaling—has been prosecuted with increased energy and success. The works of the Launceston and Western Railway are progressing satisfactorily, and the line is expected to be opened in the early part of next year: the Mersey and Deloraine line is also advancing towards completion; and an Engineering Survey of a Main line to connect the two principal ports at the opposite ends of the Island has been made. The establishment of a Customs Union for this group of Colonies has been proposed, and the first practical step taken, by appointing the time and place for a meeting of Representatives to discuss the terms. An Immigration Agent has been despatched to Europe, at a time peculiarly favorable for his operations, when the attention of the old countries is being more seriously turned to these Southern Colonies, and when the latter are rising in public favor. The credit of our Colony stands high in the English money market, and capitalists are ready to furnish funds for national undertakings of a productive character.

It is true that the pastoral interest is unusually depressed by the decline in the price of Wool, and by the prevalence of Fluke; but these drawbacks will be, more or less, neutralised by the brisk demand for Australian Meat in foreign markets, the effect of which must be to encourage the production in this Colony of Meat rather than of Wool; and it is a fortunate circumstance, that, just as the necessity arises of resorting to a change of system in this respect, the means by which that change is to be effected are presented to our hands. The depression now existing among the stock-owners will therefore, probably, not be of long continuance, and is likely to be countervailed by those other causes, actual and contingent, of prosperity to which I have referred.

It is therefore with a feeling of more hopefulness than it has hitherto been possible to cherish, that I now place these records in your hands.

I have the honor to be,
Sir,
Your most obedient Servant,

E. C. NOWELL, *Government Statistician.*

(a) Not working at any time during the year. (b) From 24 April to 28 August. (c) Cannot be given, the working account and expenditure in extending the plant not having been kept separate.

In regard to the alluvial operations, the particulars are chiefly derived from the weekly reports of the Police, which were placed at my disposal by the Council Clerk; those of the Union Quartz Crushing Company were furnished by the Secretary.

E. C. NOWELL, *Government Statistician.*

PUBLIC DEBT.

MEMORANDUM showing the Amount of the various LOANS *of the Government of* TASMANIA.

	£	s.	d.
Consolidated Loan, (see Statement A)	700,000	0	0
Debentures redeemable in Hobart Town, (see Statement B)	327,400	0	0
Debentures authorised but not issued, (see Statement C)	84,200	0	0
	1,111,600	0	0
Deduct Debentures redeemable in the year 1869 which are provided for under Act 32 Vict. No. 4	17,200	0	0
	£1,094,400	0	0

W. LOVETT, *Assistant Colonial Treasurer.*

Colonial Treasury, Hobart Town,
31 *December*, 1868.

THE Rate of Interest paid upon all the Loans hitherto contracted by the Government of Tasmania is 6 per cent. per annum. The Interest upon the Debentures authorised by the Consolidation Act (Return A) is payable on January 1st and July 1st in each year: upon all other Debentures on such dates as the Governor in Council may appoint.

E. C. NOWELL, *Government Statistician.*

All Machines, or portions of machines, to be worked only by steam, wind, or water.

Drawbacks.

There is allowed upon the exportation of the following articles and goods imported into the Colony; viz.—Wine, tea, sugar, coffee, cocoa, chicory, currants, raisins, dates, rice, hops, malt liquors, candles, wax and composition, ginger, pepper, sago, soda crystals, sulphur, white lead, sheet lead, Barcelona nuts, mustard, manufactures of silk, cotton, linen, and wool and all articles manufactured therefrom; drapery, haberdashery, hosiery, millinery, furs, hats, boots, shoes, woolbags, and cornsacks, being in the original packages in which the same were imported, a drawback of the Duty paid thereon, provided always that proof be made to the satisfaction of the Collector that the full duties due on importation have been paid; and upon the exportation of jam, packed in jars or tins only, manufactured in the Colony, a drawback of two pounds eight shillings for every ton net weight of jam: provided that the exporter or manufacturer gives notice in writing to the Collector of his intention to pack jam for export; and the Collector is required upon the receipt of such notice, either himself or by an officer of Customs appointed by him for such purpose, to view such jam, and also to seal the case or cases in which such jam is packed.

No drawback is allowed upon the exportation of jam in any quantity less than one ton, or on any other articles or goods entered for drawback unless the Duty on any one of such articles or goods amounts to Five Pounds, and unless such goods are shipped within three years from the day of importation thereof, or in the case of the exportation of jam manufactured in the Colony, within one year from the time when the exporter shall declare the same to have been manufactured, or in the case of malt liquors within one year from the day of importation thereof: and any person making such declaration falsely in any particular is subject to a penalty of not less than One hundred Pounds.

Drawback of Duty is allowed upon Carriages imported by Visitors for their private use, upon re-shipment within six calendar months from date of inward entry.

	NOTE.—The purchase or consideration money is to be truly expressed and set forth in words at length in or upon every such principal or only deed or instrument of title or conveyance.			

Authority under which levied, or by which legalised.	*Specification of Taxes, Duties, Fees, &c.*	*Authority under which originally established.*	*At what Period.*
32 Vict. No. 2.	And where any lands or other property of different tenures or holdings, or held under different titles, contracted to be sold at one entire price for the whole, shall be conveyed to the purchaser in separate parts or parcels by different deeds or instruments, the purchase or consideration money shall be divided and apportioned in such manner as the parties shall think fit, so that a distinct price or consideration for each separate part or parcel may be set forth in or upon the principal or only deed or instrument of conveyance relating thereto, which shall be charged with the said *ad valorem* duty in respect of the price or consideration money therein set forth. And where any lands or other property contracted to be purchased by two or more persons jointly, or by any person for himself and others, or wholly for others, at one entire price for the whole, is conveyed in parts or parcels by separate deeds or instruments to the persons for whom the same is purchased for distinct parts or shares of the purchase money, the principal or only deed or instrument of conveyance of each separate part or parcel, shall be charged with the said *ad valorem* duty in respect of the sum of money therein specified as the consideration for the same. But if separate parts or parcels of such lands or other property are conveyed to or to the use of or in trust for different persons in and by one and the same deed or instrument, then such deed or instrument shall be charged with the said *ad valorem* duty, in respect of the aggregate amount of the purchase or consideration moneys therein mentioned to be paid or agreed to be paid for the lands or property thereby conveyed. And where any person having contracted for the purchase of any lands or other property, but not having obtained a conveyance thereof, shall contract to sell to any other person, and the same shall in consequence be conveyed immediately to the sub-purchaser, the principal or only deed or instrument of conveyance shall be charged with the said *ad valorem* duty in respect of the purchase or consideration money therein mentioned to be paid or agreed to be paid by the sub-purchaser. And where any person having contracted for the purchase of any lands or other property, but not having obtained a conveyance thereof, shall contract to sell the whole or any part or parts thereof to any other person or persons, and the same shall in consequence be conveyed by the original seller to different persons in parts or parcels, the principal or only deed or instrument of conveyance of each part or parcel thereof shall be charged with the said *ad valorem* duty in respect only of the purchase or consideration money which shall be therein mentioned to be paid or agreed to be paid for the same by the person or persons to whom or to whose use or in trust for whom the conveyance shall be made without regard to the amount of the original purchase money. And in all cases of such sub-sales as aforesaid the sub-purchasers, and the persons immediately selling to them, shall be deemed and taken to be the purchasers and sellers within the intent and meaning of the provisions of this Act relating to the *ad valorem* duties on conveyances on the sale of property thereby imposed. But where any sub-purchaser shall take an actual conveyance of the interest of the person immediately selling to him, which shall be chargeable with the said *ad valorem* duty in respect of the purchase or consideration money paid or agreed to be paid by him, and shall be duly stamped accordingly, any deed or instrument of conveyance to be afterwards made to him of the property in question by the original seller shall be exempted from the said *ad valorem* duty, and be charged only with the ordinary duty on deeds or instruments of the same kind, not upon a sale. And where any lands or other property separately contracted to be purchased of different persons at separate and distinct prices shall be conveyed to the purchaser, or as he shall direct in and by one and the same deed or instrument, such deed or instrument shall be charged with the said *ad valorem* duty in respect of the aggregate amount of the purchase or consideration moneys therein mentioned to be paid or agreed to be paid for the same. And where any lands or other property shall be sold and conveyed in consideration wholly or in part of any sum of money charged thereon by way of mortgage or otherwise, and then due and owing to the purchaser, or shall be sold and conveyed subject to any mortgage, bond, or other debt, or to any gross or entire sum of money to be afterwards paid by the purchaser, such sum of money or debt shall be deemed the purchase or consideration money, or part of the purchase or consideration money, as the case may be, in respect whereof the said *ad valorem* duty is to be paid. And to prevent doubts respecting what shall be deemed the principal deed or instrument of conveyance in certain cases, it is hereby declared :	32 Vict. No. 2.	1 Oct. 1868.

Authority under which levied, or by which legalised.	*Specification of Taxes, Duties, Fees, &c.*	£ s. d.	*Authority under which originally established.*	*At what Period.*
32 Vict. No. 2.	That where *upon the sale of any annuity or other right not before in existence* the same shall not be created by actual grant or conveyance, but shall only be secured by bond, warrant of attorney, covenant, contract, or otherwise, the bond or other instrument by which the same shall be secured, or some one of such instruments if there be more than one, shall be deemed and taken to be liable to the same duty as an actual grant or conveyance. And where there shall be several deeds, instruments, or writings for completing the title to the property sold, such of them as are not liable to the said *ad valorem* duty shall be charged with the duty to which the same may be liable under any general or particular description of such deeds, instruments, or writings contained in this or any other Act imposing Stamp Duties. And where *in any case not hereby expressly provided for* of several deeds, instruments, or writings a doubt shall arise which is the principal, it shall be lawful for the parties to determine for themselves which shall be so deemed, and to pay the said *ad valorem* duty thereon accordingly; and if necessary the other deeds, instruments, or writings on which the doubt shall have arisen shall be stamped with a particular stamp for denoting or testifying the payment of the *ad valorem* duty upon all the deeds or instruments being produced and appearing to be duly stamped in other respects. And where there shall be duplicates of any deed or instrument chargeable with the said *ad valorem* duty, one of them only shall be charged therewith, and the other or others shall be charged with the ordinary duty on deeds or instruments of the same kind not upon a sale, and on the whole being produced duly stamped as hereby required, the latter shall also be stamped with a particular stamp for denoting or testifying the payment of the said *ad valorem* duty.		32 Vict. No. 2.	1 Oct. 1868.
	Exemptions from the preceding Duties on Conveyances upon the Sale of Lands, &c. All transfers of Debentures of the Colony or guaranteed by the Governor. All leases except so far as the same may be in consideration of any fine or forgift. All grants and conveyances of Waste Lands of the Crown.			
	Deed.—For every deed or certificate or document of title under *The Real Property Act*, where not subject to *ad valorem* duty under this Act	0 5 0		
	Provided that where *ad valorem* duty is payable upon any deed no deed stamp shall be necessary.			
	Denoting Stamp or Certificate where there are several Deeds, &c. on one of which the prescribed Duty has been paid.....	0 5 0		
	Foreign Bill of Exchange drawn in, but payable out of, the Colony. If drawn singly or otherwise than in a set of three or more, the same duty as on an inland bill of same amount and tenor; to be paid by the Drawer. If drawn in sets of three or more, for every Bill of each set not less than one-third of the same duty as on an inland bill of the same amount and tenor; to be paid by the Drawer.			
	Foreign Bill of Exchange drawn out of the Colony, and payable within the Colony, the same duty as on an inland bill of the same amount and tenor; to be paid by the Holder.			
	Foreign Bill of Exchange drawn out of the Colony, and payable out of the Colony, but indorsed or negociated within the Colony, the same duty as on a foreign bill drawn within the Colony, and payable out of the Colony; to be paid by the Holder.			
	Mortgage, conditional surrender by way of mortgage, further charge or disposition, by way of security, reversion of or affecting any property real or personal whatsoever. Also any conveyance of any lands, estate, or property whatsover in trust, to be sold or otherwise converted into money, which shall be intended only as a security, and shall be redeemable before the sale or other disposal thereof, either by express stipulation or otherwise, *except where such conveyance is made for the benefit of creditors generally, or for the benefit of creditors specified, who shall accept the provision made*	At half the rate on the amount secured as would be payable on the same amount if it were the consideration for the conveyance upon the sale of lands, &c.		

Authority under which levied, or by which legalised.	*Specification of Taxes, Duties, Fees, &c.*	£ s. d.	*Authority under which originally established.*	*At what Period.*
32 Vict. No. 2.	*for payment of their debts in full satisfaction thereof, or who shall exceed five in number.* Also any defeasance, declaration, or other deed or writing for defeating or making redeemable, or explaining or qualifying any conveyance or disposition of any lands, estates, or property whatsoever, which shall be apparently absolute, but intended only as a security. Also any agreement, contract or bond, accompanied with a deposit of title deeds or documents for making a mortgage, or any such other security or conveyance as aforesaid, of any lands, estate or property comprised in such title deeds or documents, for pledging or charging the same as a security. Where the same respectively shall be made as a security for the payment of any definite and certain sum of money advanced or lent at the time, or previously due and owing, or forborne to be paid, being payable.	At half the rate on the amount secured as would be payable on the same amount if it were the consideration for the conveyance upon the sale of lands, &c.	32 Vict. No. 2.	1 Oct. 1868.
	And where the same respectively shall be made as a security for the repayment of money to be thereafter lent, advanced, or paid, or which may become due upon an account current, together with any sum already advanced or due, or without, as the case may be, *other than and except any sum or sums of money to be advanced for the insurance of any property comprised in such mortgage or security against damage by fire, or to be advanced for the insurance of any life or lives, pursuant to any agreement in any deed whereby any annuity shall be granted or secured for such life or lives.* If the total amount of the money secured or to be ultimately recoverable thereupon shall be uncertain and without any limit	12 10 0		
	But if the total amount of the moneys secured or to be ultimately recoverable thereupon shall be limited not to exceed a given sum.	The same duty as on a mortgage for such limited sum.		
	And where the same respectively shall be made as a security for the transfer or re-transfer of any Debenture in consideration of Debentures or money advanced or lent at the time or previously due and owing, or forborne to be paid, being payable.	The same duty as on a mortgage for a sum of money equal to the value of such Debenture according to the average price thereof on the date of the mortgage.		
	And where the same respectively shall be made as a security for the payment of a sum of money and also for the transfer or re-transfer of any Debentures, the said *ad valorem* duty shall be charged in respect of each. And in case the same respectively shall be made as a security for the payment or transfer to different persons of separate and distinct sums of money or Debentures, the said *ad valorem* duty shall be charged for and in respect of each separate and distinct sum of money or Debenture secured, and not upon the aggregate amount thereof. Any transfer or assignment, disposition or re-conveyance of any mortgage or of any such other security as aforesaid, or of the benefit thereof, or of the money or Debenture thereby secured, provided no further sum of money or Debenture be added to the principal money or Debenture already secured	1 0 0		
	And if any further sum of money or debenture shall be added to the principal money or debenture already secured, the said *ad valorem* duty on mortgages shall be charged only in respect of such further money or Debenture. Provided always, that where several distinct deeds or instruments falling within the description of any of the instruments hereby charged with the said *ad valorem* duty on mortgages shall be made at the same time for securing the payment or transfer of one and the same sum of money, the said *ad valorem* duty shall be charged only on one of such deeds or instruments, and if required for the sake of evidence, all the rest of such deeds or instruments shall be also stamped with the same particular stamp for denoting or testifying the payment of the said *ad valorem* duty on all the said deeds or instruments being produced duly stamped with the duties charged thereon.			

Authority under which levied, or by which legalised.	*Specification of Taxes, Duties, Fees, &c.*	£	*s.*	*d.*	*Authority under which originally established.*	*At what Period.*
32 Vict. No. 2.	And where there shall be duplicates of any deed or instrument chargeable with the said *ad valorem* duty on mortgages, one of them only shall be charged therewith; and on the whole being produced, duly stamped as by law required, the latter shall also be stamped with a particular stamp for denoting or testifying the payment of the said *ad valorem* duties.				32 Vict. No. 2.	1 Oct. 1868.
	Exemptions from the said ad valorem *duty on Mortgages, &c., but not from any other duty to which the same may be liable.*					
	Any deed or other instrument made for the further assurance only of any estate or property already mortgaged, pledged, or charged as a security by any deed or instrument which shall have paid the said *ad valorem* duty.					
	Any deed or instrument made as an additional or further security for any sum or sums of money, or any Debenture already secured by any deed or instrument which shall have paid the said *ad valorem* duty; but if any further sum of money or Debentures shall be added to the principal money or Debenture already secured, or shall be thereby secured to any other person, the said *ad valorem* duty shall be charged in respect of such further sum of money or Debenture.					
	And if necessary for the sake of evidence the deeds and instruments hereby exempted from the said *ad valorem* duty shall be stamped with a particular stamp for denoting or testifying the payment of the said *ad valorem* duty upon all the Deeds and Instruments relating to the particular transactions being produced, and appearing to be duly stamped with the duties to which they were liable.					
	Mortgage, with the conveyance of the equity or right of redemption or reversion or other matter in the same deed; viz.—					
	Where any deed or writing shall operate as a mortgage or other instrument charged with the *ad valorem* duty on mortgages, and also as a conveyance of the equity or right of redemption or reversion of any lands, estate, or property therein comprised to or in trust for and according to the direction of a purchaser, such deed or writing shall be charged not only with the said *ad valorem* duty on mortgages, but also with the *ad valorem* duty charged on a conveyance upon the sale of any property: but where the equity or right of redemption or reversion shall be thereby conveyed or limited in any other manner, such deed or writing shall be charged only as a mortgage.					
	And in all other cases where a mortgage or other instrument hereby charged with the *ad valorem* duty on mortgages shall be contained in one and the same deed or writing with any other matter or thing (except what shall be incident to such mortgage or other instrument), such deed or writing shall be charged with the same duties as such mortgage or other instrument and such other matter or thing, would have been separately charged with if contained in separate deeds or writings.					
	SUPREME COURT.					
	The Fees collected by the Registrar of the Supreme Court under the Rules of Court relating to Common Law, Equity, and Divorce are too voluminous and intricate for publication here.					
	Other Fees fixed by Statute are the following:—

MEMO.—The Returns hitherto furnished of the Area of Crown Land under Rental have, for many years past,* shewn a considerable excess beyond the actual quantity under lease, which has only lately been discovered, since the last Returns were prepared. It is difficult now to account for the very great discrepancy; but it may have arisen, in some measure, from the fact that, *after* the annual Returns are made up, lists of persons who have failed to pay rent are received from the Colonial Treasury, and they have not been taken into consideration when the Returns for the following year have been prepared.

* Up to, and including, 1866.

J. E. CALDER, *Surveyor-General.*

Explanation—* Persons always Free. † Persons Free by Servitude. ‡ Holders of Conditional Pardons. § Convicts holding Tickets of Leave.

NOTE.—The difference in the number of persons committed for trial in 1867, viz., 227, and in 1868, viz., 178, may, I think, be fairly accounted for by the fact that "The Petty Offences Act," 31 Vict. No. 12, which came into force on the 11th October, 1867, enabled Justices to deal with many cases which, before that Act came into force, would have been sent on to a higher Court for trial.

The jurisdiction of Justices was enlarged,—1st. By *increasing the value* of the property in respect of offences cognizable by Justices, from £5 to £10. 2nd. By adding the offences of "Embezzlement" and "Larceny as a Bailee" to those named in the Acts 19 Vict. No. 5, and 23 Vict. No. 4, repealed and consolidated by 31 Vict. No. 12. 3rd. By taking from persons who have been previously convicted within a certain period the option of trial by Jury. (Sect. 3 of 31 Vict. No. 12.)

F. STOPS, *Clerk to the Attorney-General.*

[a] No Return furnished. The particulars are therefore taken from last year's Return.

Note.—The particulars from which this Statement is compiled were furnished by the respective Returning Officers. In some instances, as regards the House of Assembly, they are manifestly incorrect; but, as there is no law or regulation requiring the Returning Officers to keep a record of the state of the Rolls, and as the original Rolls after revision are, in accordance with the Electoral Act, deposited with the Clerks of the Peace, it would have been useless to call upon the Returning Officers to correct the errors.

E. C. NOWELL, *Government Statistician.*

In dealing with fractional parts, the following rule has been observed :—all quantities under one-half have been neglected ; one-half and over have been treated as whole numbers.

Number of Acres of Wheat reaped { By machine ..... 1896* ; By hand ..... 39,400* }

*At Hamilton and Port Sorell, not stated.

Number of Persons from whom were received { Agricultural and Live Stock Returns .. 5164† ; Live Stock Returns only ..... 996† }

†At Glenorchy, Hamilton, and Port Sorell, not stated.

E. C. NOWELL, *Government Statistician.*

APPENDIX B.

EXTRACTS from Reports of Collectors of Agricultural Statistics.

1. BOTHWELL.

You will observe that, notwithstanding the increased area under wheat, the produce is 300 bushels less than the preceding year, which must be attributed to the long-continued drought during the spring and summer months. Barley and oats were not so extensively sown. The acreage under hay was rather more, but the yield considerably less—about half—which is also attributable to the unusually dry season.

Owing to the large reduction recently made in the area of this Municipality, the number of sheep and horses is less than in the Return for last year.

This District, from its natural features, insulated position, and lightness of soil, is almost necessarily exclusively devoted to pastoral purposes. The inducements to grow cereal crops are not sufficiently encouraging to render it advisable to break up new land.

I trust the Returns will be found satisfactory. The entire work has been performed by myself, and I can vouch for their accuracy.

H. G. QUODLING.

2. BRIGHTON.

There is a great decrease in the past year's crops. The season was a very dry one. There was no rain in this District during the summer months. Some of the farmers' wheat crops were so bad that they had to turn their stock upon it. There have been no improvements in the District during the past year—no building going on—and the fences in a dilapidated state.

CHARLES WRIGHT, *Collector.*

3. CAMPBELL TOWN.

Although this Return, when compared with that of the preceding year, shows an increase in the number of acres cropped, there is a considerable diminution in the total product, the general cause of which is attributable to the dryness of the past season. There is a small increase in the live stock this year, as shown by Return.

JOHN R. CHAMBERS, *Collector.*

4. CLARENCE.

In the accompanying Returns a marked change will be found in the total produce of cereals and other crops as compared with former years. This I attribute to the long drought; and as the farmers in this District, as a rule, are very early in sowing, they have suffered to a much greater extent than those Districts lying more to the westward, which have more humidity and a far larger rainfall. This part of the country presents very few opportunities for sheep-farming on anything like an extensive scale. Most of the areas are much too small, and the land is not good for feeding; but one peculiarity seems to attend most of the flocks, and that is,—an almost total absence of fluke.

W. I. THOMAS, *Collector.*

5. DELORAINE.

I have the honor to forward the stock and crop Returns for 1868-9.

I beg to assure you that I have taken the greatest care to make them as correct as possible; and this must be my apology for detaining them so long.

You will observe the average yield of wheat per acre this year is very small, but much better than that of the year before.

The two last seasons were very unfavourable to this District. Rust was very prevalent in the crop of 1867-8; and I have known instances where growers did not realise one-fourth of their reasonable expectations. The rust affected the heaviest crops most, and the sample was very inferior. It is the opinion of all the farmers that the average given (11·43) of the wheat crop of that season is as near as possible correct.

The drought which set in early last season is the cause of the low average yield as given in this Return. The oat crop suffered most; and, after the weather breaking, an undergrowth sprang up, which, in many cases, rendered the sample very inferior. The wheat suffered in quantity; but, there being an entire absence of rust, the sample was very fine.

I believe the drought affected this District more than any other. The crops are not put in, any year, as early as in other Districts, and were therefore in a critical time and stage of their growth when the drought set in.

J. FITZGERALD, *Superintendent of Police.*

---

6. EVANDALE.

In forwarding the Agricultural and Live Stock Returns for the year ended 31st ultimo, I beg to inform you that no trouble has been spared in making them as accurate as possible, and I believe them to be as reliable as they can be made. I also beg to add, for your information, that the acreage under oats is only about half of former years, whilst barley has been doubled. I know from personal observation that such is the fact; the latter crop has been found to be more remunerative, and the difficulty that was formerly experienced in threshing it by machine has been obviated by the importation of an improved machine by a resident of the District. There is a decrease in the number of cattle, consequent on the shortness of feed last winter, whereby many had no choice but to sell either sheep or cattle, and the extreme low price of the former caused owners to refrain from selling them. I may also add, that a great many horses left this District during the same time for the New Zealand market.

R. MARRIOTT, *Superintendent of Police.*

---

7. FINGAL.

As the Returns were not collected by me last year, I cannot report at length on the improvements which have been made during the past season. The only ones worthy of special mention are, some new land broken up, and the re-settlement of the Portland sheep-run on the Great Musselroe River; but I am afraid this latter will ultimately have to be abandoned, on account of the loss of sheep which is sure to take place. This has happened nearly every season since the run was first taken up twenty-four years ago.

The plant which is supposed to cause this loss something resembles common garden thrift, only it bears a scarlet flower, growing on a stalk like a hyacinth; the same herb is supposed to be poisonous at Fowler's Bay in South Australia.

Gould's New Country, at George's Bay, is being settled slowly, but, with the exception of some small patches here and there, I am afraid the land will not turn out nearly so good as was at first expected; the larger portion of it will, I think, be found to consist of a very light-coloured clay, which when cleared and cultivated will turn to mud in winter and dust in summer. Some of the settlers are busy clearing their blocks and getting up temporary residences. It will make pasture land, but I doubt its adaptability for agriculture.

But little agriculture is attempted in this District, butter and cheese being, next to wool, the principal articles produced; and I would recommend that columns be provided for these commodities in next year's Returns: this District will not compare favourably with others unless the dairy produce is returned also.

The past season has not been at all a favourable one for this District; the want of our usual supply of spring rain caused an almost total failure in the crops, and at one time many of the farmers in the Break o'Day District were compelled to milk their cows once a day only. This would, of course, interfere greatly with the total quantity produced.

I would draw particular attention to the enormous crops of potatoes raised by Mr. Wardlaw, of Piccaninni Point. Off four acres of land he took 75* tons of potatoes fit for the market. The crop was put in as early as the middle of August. These potatoes were not moulded in the usual way. The soil is a light vegetable mould mixed with river sand, and dressed with large quantities of kelp.

But a small quantity of land will be broken up this year, the settlers generally turning their attention to dairy produce or wool growing. A large number of cattle are also fattened and sent to market every year, and many more would be fattened if a duty were imposed on all meat coming from Australian ports.

This District, like the rest of the Island, is suffering from the dulness of trade; and until our fine deposits of coal are worked, or gold proved to be in payable quantities, the depression will continue. A great deal might be done in the way of manufactures: we have every convenience—an unlimited supply of wood, water, and coal—but the people are slow to take advantage.

The settlers are, generally, quite willing to give the information sought, but with few exceptions will not take any trouble in the matter. I do not consider that any amount of trouble the Collector may take will ensure accuracy in these Returns.

FRED. F. GROOM, *Collector.*

* Being at the rate of 18¾ tons per acre.—E.C.N.

8. FRANKLIN.

I HEREWITH enclose the Agricultural and Live Stock Returns for the Huon District for the year ending the 31st March, 1869, which have been prepared with the greatest care. There has been but little improvement in agriculture in this District, with the exception that a few individuals are turning their attention to hop growing. The crops throughout the District on the whole have turned out well, as you will perceive by the total produce in most instances. There has been a great increase in apples and pears this year as compared with last year.

JOHN M'GINNESS, *C.D.C.*

---

9. GEORGE TOWN.

THE low average of the grain crop is accounted for by the farmers through destruction caused by grub, &c., and the long-continued drought, especially on the North-east Coast; in the other portions of the District, I attribute the falling off to the crops, in most cases, being put in too late.

Pastoral pursuits have not improved, although two flocks have been added; viz.—1300 and 700. The losses from fluke and other casualties have been heavier than in the previous year.

JOHN LAMBERT, *Collector.*

---

10. GLAMORGAN.

IN forwarding the Agricultural and Live Stock Returns for the past year, I beg to state that there is a slight improvement in favour of agriculture; the blight, mildew, and rust appear to be decreasing, and the land generally regaining a more healthy state. The pastoral interest is, I think, on the wane; the scab is very prevalent among the sheep, owing to the scarcity of food during the autumn and winter; the increase of lambs is very poor. The agricultural Return shows 28 acres under green forage. The produce per acre, as near as I could ascertain, is about 5 tons, which gives 140 tons. I have not added it with the hay, as it would make the produce of that crop very inaccurate, green fodder being so much heavier than dry hay.

GEO. COTTON.

---

11. GREEN PONDS.

IN consequence of the scarcity of bush feed in this District during the past year, a great deal of ground originally sown was eaten off by sheep breaking into it, that and the drought destroying any chance of a crop. The land was ploughed up again, which accounts for the acreage of fallow being so great this year.

The deficiency in the number of sheep this year arises from so many having been sent to the Lakes and kept there, owing to the want of feed, which in other years have been kept in the District.

THOS. W. STANWIX, *Collector.*

---

12. LAKE DISTRICT.

FROM the way that private property and the crown lands are mixed up in this District, and the shifting of sheep from one run to another, I find it impossible to ascertain the number depastured on each, unless where a person has nothing but crown land, as in the case of Capt. Langdon and Mr. Howells.

Many more sheep will, therefore, be depastured on crown land than set down in the form, as all the settlers rent more or less crown land fenced in with their properties, and therefore cannot say accurately how many are run upon it.

JAMES WILSON, *Chief Constable.*

---

13. LAUNCESTON, (SELBY.)

HEREWITH I forward Returns of Agricultural Statistics of District of Selby for the year ending 31st March, 1869.

A comparison of these with Returns of former years will show a considerable discrepancy in the acreage under various crops. This is chiefly to be accounted for from the fact of a portion of my District having been added during the past year to the Municipality of Westbury. The part taken from me contains large proportions of cultivated land.

I have taken special pains with the Statistics this year. I divided my District into a number of Sub-Districts, appointing a Collector to each, and caused every farmer and landholder to be visited. I have tested the correctness of the Sub-Collectors' work by inquiry made by myself, and I have reason to believe that the attached Returns are as nearly correct as it is possible to make them.

The deficiency in this year's Return under head "Artificial Grasses, Seed" is accounted for by all grass land having been hitherto returned as grown for seed.

J. PROPSTING.

---

14. OATLANDS.

[The following Notes were appended by the Collector to his Returns.]

1. The yields of all the grain and root crops per acre are lighter than last year from the drought.

2. The apple crop nearly a failure from early frosts.

3. Before this year the heading "All other Lands under Cultivation" was not perfectly understood.

The foot-note No. 5 to Form A. has led to a fuller Return, and a consequent increase under that head.

4. The decrease in number of sheep is caused in a great measure by deaths by Fluke. All persons were not willing to state their losses from this cause, but 20 persons acknowledge a loss of 17,460 by Fluke.

WILLIAM EXTON, *Collector.*

---

15. ROSS.

THE agricultural area is small compared with that in last Return, and the crops (consequent on the great scarcity of rain during the season) very meagre. The number of horses, horned cattle, and pigs is nearly the same as last year. There is a decrease in the Return in reference to sheep, of 10,874. To account for this I have to say that Mr. ——'s estate represented last year 29,000. This certainly was an error, as his property in this District will carry not more than 16,000.

[Here follow explanations of certain other differences, which, as affecting individuals, it is not advisable to publish.]

Messrs. —— appear to have been missed entirely in last year's Return. In making up the Return I have not reckoned the fallow land as being under rotation of crops: if cropped next year, other land would be left under fallow in almost all cases.

I have no improvements to note for the last year, either agricultural or pastoral, in this District.

I have endeavoured to make this Return as correct as possible.

W. E. WARNER, *Collector for District of Ross.*

---

16. SPRING BAY.

THE acreage of wheat is less by over 100 acres than it was last year: in barley there is an increase in acreage, but much less in the number of bushels. In the oats crop there is a decrease from last year: in the acreage of hay there is an increase, hence the decrease in wheat, as a great portion of it was cut for hay. The pea crop was never so low in this District as this year.

Live Stock.—In horses there is a small decrease from last year, and in horned cattle there is an increase of over 100; in sheep there is a large increase over last year of nearly 8000, but the reason of this is Mr. ———— has 4000 in the District that were not in it last year, Mr. ———— has an increase of 1000, and Mr. ———— has 1200, but had none last year: those sheep have been purchased out of the District. Others have an increase in pigs: there is a decrease from last year of nearly 400; but I find on enquiry that bacon and pork being so very low last year, the people here did not care about rearing pigs this year.

All other Cultivated Land.—Under this heading there is much less than last year, and the reason is that many persons included land that relapsed into a state of nature as "all other cultivated Land."

There are no improvements in agricultural or pastoral pursuits in this District, that I can observe, during the year, but on the contrary I observe that a great amount of land hitherto under cultivation is now allowed to relapse into a state of nature,—that is on large farms.

S. MURPHY, *Superintendent of Police.*

---

17. WESTBURY.

In forwarding Stock and Crop Returns I find I omitted supplying you with what has come under my own observation with respect to the system of farming in general in this District, where perhaps the best system in the Colony is adopted. Drainage of the land has not yet been sufficiently attended to, nor has fallowing during the summer months, which is an excellent preparation where the land is dirty, and, where there is not sufficient manure to help and nourish the land, is the very best thing that the farmers can do: when attended to, good results invariably follow. The land is cropped year after year, and must therefore require nourishment in the shape of manure, which I am happy to inform you is lately beneficially carried out.

Where irrigation with little expense can be carried out, nothing renews or refreshes the land better. Irrigation of late commands more attention, and with good results. Growing grain has not paid the farmers of late years. The farmer who neglects to grow mangel wurzel, pease, beans, turnips, carrots, &c. is not as well repaid as he who grows a fair share of the latter, which are profitably used in fattening cattle during the winter months.

MYLES MAHONEY, *Superintendent of Police.*

JAMES BARNARD,
GOVERNMENT PRINTER, TASMANIA.
